## Voices Of Reason:

**Yielding Gender** Penelope Deutscher, 2002-01-22 Traditional accounts of the feminist history of philosophy have viewed reason as associated with masculinity and subsequent debates have been framed by this assumption Yet recent debates in deconstruction have shown that gender has never been a stable matter In the history of philosophy female and woman are full of ambiguity What does deconstruction have to offer feminist criticism of the history of philosophy Yielding Gender explores this question by examining three crucial areas the issue of gender as troubled deconstruction and feminist criticism of the history of philosophy The first part of the book discusses the work of Judith Butler Jacques Derrida and contemporary French feminist philosophy including key figures such as Luce Irigaray Particular attention is given to the possibilities offered by deconstruction for understanding the history of philosophy The second part considers and then challenges feminist interpretations of some key figures in the history of philosophy Penelope Deutscher sketches how Rousseau St Augustine and Simone de Beauvoir have described gender and argues that their readings of gender are in fact empowered by gender s own contradiction and instability rather than limited by it

Critique and Disclosure Nikolas Kompridis, 2011-08-19 A provocatively argued call for shifting the emphasis of critical theory from Habermasian critique restricted to normative clarification to disclosure a possibility enhancing approach that draws on and reinterprets ideas of Heidegger In Critique and Disclosure Nikolas Kompridis argues provocatively for a richer and more time responsive critical theory He calls for a shift in the normative and critical emphasis of critical theory from the narrow concern with rules and procedures of Jürgen Habermas s model to a change enabling disclosure of possibility and the enlargement of meaning Kompridis contrasts two visions of critical theory s role and purpose in the world one that restricts itself to the normative clarification of the procedures by which moral and political questions should be settled and an alternative rendering that conceives of itself as a possibility disclosing practice At the center of this resituation of critical theory is a normatively reformulated interpretation of Martin Heidegger s idea of disclosure or world disclosure In this regard Kompridis reconnects critical theory to its normative and conceptual sources in the German philosophical tradition and sets it within a romantic tradition of philosophical critique Drawing not only on his sustained critical engagement with the thought of Habermas and Heidegger but also on the work of other philosophers including Wittgenstein Cavell Gadamer and Benjamin Kompridis argues that critical theory must in light of modernity s time consciousness understand itself as fully situated in its time in an ever shifting and open ended horizon of possibilities to which it must respond by disclosing alternative ways of thinking and acting His innovative and original argument will serve to move the debate over the future of critical studies forward beyond simple antinomies to a consideration of as he puts it what critical theory should be if it is to have a future worthy of its past

the news Major news outlets are all offering their positive opinions on how world wide women leaders have addressed the crisis and reassured their people While this sort of press coverage is certainly uplifting little to no research has been conducted to investigate the effectiveness of women s leadership decisions and strategies in these difficult times In concert with these global struggles resulting from the pandemic are the challenges faced by higher education Many colleges and universities have all but shuttered their doors and are conducting instruction student support and day to day business almost completely online Women academic leaders bear a great load during global crises with the combination of maintaining work responsibilities and caring for families and personal households It is shown that women leaders may feel overwhelmed but remain heroes in unprecedented times of crisis *Women and Leadership in Higher Education During Global Crises* informs readers and expands their understanding about specific challenges issues strategies and solutions that are associated with women leaders in higher education the implications during the current pandemic and other natural disasters and how these strategies can be used for future agility and success The chapters will cover narratives strategies and initiatives that women leaders are using to lead their institutions departments sectors and organizations It ties together the unimaginable challenges joys struggles and successes encountered by women in leadership in higher education and is ideal for higher education administrators teachers leaders faculty provosts deans program leaders researchers academicians and students interested in both the challenges and successes women leaders in higher education face during global crises
