The public is now taking an active interest in the subject of birth control and asking for information about contraceptive measures. It is important that what they are told should be thoroughly sound. The well-to-do of the population should now have no difficulty in obtaining the new knowledge ; but it is otherwise in the case of the poor working women with a history of several rapidly succeeding pregnancies, the constant fear of another, and already impaired health, whose piteous plight is so graphically portrayed in these pages. Nurses, midwives and social workers have great opportunities for gaining the confidence of these much worried mothers, and so for helping them by kindly and good advice such as is clearly and courageously provided for their guidance in these pages, which cover a wide field and contain a great deal of useful information and practical detail.
