Franks,1977-12-15 The exhilaration of challenging and surviving rapids in a fragile canoe has made white water canoeing one of the fastest growing sports in Canada Much of this book is concerned with analyzing white water with the techniques for handling it rather than trying to conquer it by brute force with canoeing safety and with the planning and organizing of safe but adventurous trips But *The Canoe and White Water* goes far beyond primers in canoeing skills It sets the sport in the contexts of history technology geology and physics The author describes how canoes have been made over the centuries the factors governing their design and the features to look for in choosing one today In tracing the history of the canoe he rediscovers part of the Canadian heritage His own experience has led him to pursue the sciences which help the canoeist understand the sport he discusses the physics of river turbulence the geological formation of rivers and environmental questions His interests range from the personal rights of modern canoeists to the eating habits of the voyageurs of old The book reflects his enthusiasm and his research The text is illustrated with modern photographs instructive drawings of paddle strokes and river situations It is a clear concise and interesting account which will delight the enthusiast and intrigue the curious *White Water Safety and Rescue* Franco Ferrero,2006 White water safety and rescue for canoeists kayakers and rafters A completely revised new edition now in full colour throughout You can find presentation resources of the photos and illustrations below The writing of this book started when I tried to put some notes together as course notes for the safety and rescue courses I was running at Plas y Brenin It soon became clear what a huge topic it is and in sheer frustration I explained to a friend that I would have to write a book to cover it properly His answer was Why don't you This is the result I hope you find it enjoyable and informative What's new in the 2nd Edition Full colour and new photos throughout The text has been completely revised and numerous small but significant improvements have been made The principles of safety and rescue have been unified and the mnemonic CLAP adopted This is to make it easier to remember them and fall in line with current practice in the teaching of white water safety The rescue section has been reorganized to fit in more closely with the TRTTG low to high risk model The rafting sections have been completely rewritten by Geraint Rowlands The chapter Planning a Descent has been extended to cover factors to be considered when travelling abroad One handed signals as used by Paul O Sullivan in his chapter in the BCU *Canoe and Kayak Handbook* have been adopted [The Handbook of Industrial Oil Engineering](#) John Rome Battle,1920 [The Mines Handbook](#) ,1916 **Ohio Almanac and Handbook of Information** ,1913 *King's handbook of the United States, planned and ed. by M.
