Who Owns The Moon:

Who Owns the Moon? A. C. Grayling, 2024-03-07 As the world's superpowers and corporations jostle for control in space A C Grayling asks who really owns our planet Grayling brings satisfying order to daunting subjects STEVEN PINKER Silicon for microchips manganese for batteries titanium for missiles The moon contains a wealth of natural resources So as the Earth's supplies have begun to dwindle it is no surprise that the world's superpowers and wealthiest corporations have turned their eyes to the stars As this new Space Race begins A C Grayling asks who if anyone owns the moon Or Mars Or other bodies in near space And what do those superpowers and corporations owe to Planet Earth and its inhabitants as a whole From feudal common land through the rules of the sea to the vast nationless expanse of Antarctica Grayling explores the history of the places which no one and therefore everyone owns Examining the many ways this so called terra nullius has fallen victim to the tragedy of the commons the tendency for communal resources to be exploited by a few individuals for personal gain at the expense of everyone else *Who Owns the Moon* puts forward a compelling argument for a bold new global consensus one which recognises and defends the rights of everyone who lives on this planet

Who Owns the Moon? Virgiliu Pop, 2008-11-16 This work investigates the permissibility and viability of property rights on the celestial bodies particularly the extraterrestrial aspects of land and mineral resources ownership In lay terms it aims to find an answer to the question Who owns the Moon The first chapter critically analyses and dismantles with legal arguments the issue of sale of extraterrestrial real estate after having perused some of the trivial claims of celestial bodies ownership The only consequence these claims have on the plane of space law is to highlight the need for a better regulation of extraterrestrial landed property rights Next the book addresses the apparent silence of the law in the field of extraterrestrial landed property scrutinizing whether the factual situation on the extraterrestrial realms calls for legal regulations The sources of law are examined in their dual dimension that is the facts that have caused and shaped the law of extraterrestrial real estate and the norms which express this law It is found that the norms and rules regarding property rights in the celestial realms are rather limited failing to define basic concepts such as celestial body
