2025 Edition Digital Productivity

**Al-Sowaidi, Belqes, Mohammed,
Tawffeek**

2025 Edition Digital Productivity:

Jidoka in the Digital Age Mohammed Hamed Ahmed Soliman, Jidoka Toyota's principle of automation with a human touch is one of the two pillars of the Toyota Production System. While Just in Time has been widely adopted, Jidoka has often remained misunderstood, underutilized, or oversimplified. This book brings Jidoka to life for today's world of Industry 4.0, smart factories, and digital transformation. In this expanded and updated second edition, Mohammed Hamed Ahmed Soliman revisits his original 2020 work and integrates the latest advances that are reshaping quality management: artificial intelligence, machine vision, predictive maintenance, and digital twins. The result is a practical, modern guide to building defect-free processes that withstand the challenges of complexity, disruption, and global competition. What you'll learn in this edition: The two concepts of Jidoka: separating man from machine and building quality into the process; How Toyota balances productivity and quality using andon systems, buffers, and culture; Modern applications of Jidoka with AI, IoT, and Industry 4.0; Case studies from healthcare, logistics, services, and digital industries; How to apply tools like FMEA, root cause analysis, and A3 problem solving in today's digital environment; Lessons from Toyota's recalls and the rising cost of quality in the EV and software-driven era; Why this book: Practical, clear frameworks, checklists, and tools you can apply immediately; Modern, updated for 2025 realities: AI, smart factories, and global supply chains; Universal examples across industries from manufacturing to healthcare to software; Whether you are a Lean practitioner, engineer, quality professional, or business leader, this book will help you understand Jidoka in depth and apply it to create resilient, defect-free systems in the digital age.

About the Author: Mohammed Hamed Ahmed Soliman is a professor, consultant, and author of over a dozen books on Lean, operational excellence, and industrial systems. His works, including *Lean Maintenance: Toyota's Advanced GD Method* and *Heijunka: The Leveling Art of the Japanese Automaker*, are used by engineers and leaders worldwide.

[Introduction to Generative AI, Second Edition](#) Numa Dhamani, 2026-01-13. Get up to speed quickly with generative AI. AI tools like ChatGPT and Gemini, automated coding tools like Cursor and Copilot, and countless LLM-powered agents have become a part of daily life. They've also spawned a storm of misinformation, hype, and doomsaying that makes it tough to understand exactly what Generative AI actually is and what it can really do. *Introduction to Generative AI, Second Edition* delivers a clearly written survey of generative AI fundamentals along with the techniques and strategies you need to use AI safely and effectively. In this easy-to-read introduction, you'll learn: How large language models (LLMs) work; How to apply AI across personal and professional work; The social, legal, and policy landscape around generative AI; Emerging trends like reasoning models and vibe coding. *Introduction to Generative AI, Second Edition* guides you from your first eye-opening interaction with tools like ChatGPT to how AI tools can transform your personal and professional life safely and responsibly. This second edition has been completely revised to reflect the latest developments in the field, from the latest innovations in prompt engineering and AI agents to fresh coverage of multimodal training, reasoning models, no-code tools, retrieval-augmented generation (RAG), and

more About the book Introduction to Generative AI Second Edition is an up to date guide to the capabilities risks and limitations of tools like ChatGPT Gemini and Claude This easy to follow guide moves quickly through the basics giving you the skills and understanding to use AI with confidence Along the way you ll explore how AI is impacting even established industries with an expert level look at global investment in AI AI education policy AI s economic impact and the ongoing legal and ethical issues of AI usage About the reader For anyone interested in generative AI No technical experience required About the author Numa Dhamani is a natural language processing expert working at the intersection of technology and society Maggie Engler is an engineer and researcher currently working on safety for large language models

Human-AI Collaboration and the Evolving Role of Educators Al-Sowaidi, Belqes, Mohammed, Tawffeek, 2026-03-13 The increase of intelligent technologies in learning environments reshapes how knowledge is created shared and guided Rather than replacing humans these systems are utilized as collaborators that support personalization feedback and decision making in educational contexts This shift invites educators to move toward facilitation mentorship and ethical use of learning technologies As human insight and machine capabilities intersect teaching practices can be redefined to better support creativity critical thinking and lifelong learning Human AI Collaboration and the Evolving Role of Educators explores digital education technologies and AI for e learning environments It examines how AI enhances teaching learning curriculum development and institutional decision making This book covers topics such as educational technologies instructional design and professional development and is a useful resource for educators engineers academicians researchers and scientists

A Comparative Case Study on Project Coordination: Traditional Overlay vs. BIM Methodology Dr. Zaid A. Mohammed, Dr. Mohanad Hatem Shadhar, 2026-02-05 A Comparative Case Study on Project Coordination Traditional Overlay vs BIM Methodology explores the evolution of coordination practices in the construction industry through a structured comparison of conventional and BIM based approaches Authored by Mohanad Hatem Shadhar and Zaid A Mohammed the book blends theoretical foundations with practical case studies to assess how different coordination methods influence design accuracy collaboration cost control and sustainability The book addresses key concepts in construction management digital transformation and simulation technologies supported by two detailed case studies that illustrate real world coordination challenges and solutions Particular emphasis is placed on BIM s role in early clash detection integrated workflows and data driven decision making Intended for architects engineers construction managers researchers and postgraduate students this book offers practical insights into modern project coordination and the transition from traditional practices to BIM based systems

Alt-Consulting Utsav A Bhatt, 2025-12-16 The consulting industry is at a breaking point For decades strategy consulting thrived on a simple formula prestigious firms expensive teams and months long projects But the ground is shifting Generative AI is automating the work of entire analyst teams Lean boutiques are delivering partner level thinking at a fraction of traditional costs Clients are demanding speed transparency and value not just polished decks

What comes after the end of strategy consulting as we knew it In Alt Consulting seasoned strategist Utsav Bhatt maps the future of the profession with clarity and conviction Inside you ll discover Why the traditional consulting pyramid is collapsing and what s replacing it Five new archetypes reshaping the industry What law firms learned when technology disrupted them first How to buy consulting differently faster cheaper better What consultants at every level must do to stay relevant Drawing on Clayton Christensen s theory of disruptive innovation real transformation cases and timeless wisdom Alt Consulting is both a strategic playbook and a call to reimagine professional services The old model isn t broken yet But the cracks are loud Whether you re a Chief Strategy Officer tired of overpriced projects a consulting firm partner sensing the shift or a young consultant wondering about your career in ten years this book shows you how to lead not lag The disruption is already here The question is are you ready

AI for Business Jon Whittle,2026-01-19 AI for Business is a practical guide for leaders who want to harness the power of artificial intelligence without getting lost in the hype Drawing on decades of experience at the intersection of cutting edge research public policy and industry transformation Jon Whittle shows how AI can create real human centred value in your organisation With clarity and pragmatism the book demystifies AI for non technical decision makers It offers a framework for thinking strategically about AI adoption covering everything from defining the right use cases to building responsible governance navigating ethics understanding productivity impacts and aligning AI with your values Real world examples bring the ideas to life and offer actionable insights you can apply right away Whether you are a CEO policymaker innovation lead or just AI curious this book empowers you to lead with confidence curiosity and integrity in an AI powered world Because when AI works for people not just profits that s when it really delivers Jon Whittle is the ideal coach for any executive looking to navigate the AI revolution Robert Hillard Consulting Businesses Leader Deloitte Asia Pacific Many leaders will try to use AI to cut costs and this can be very effective in improving profitability but you can t cut your way to success or growth Jon s book teaches how to make AI a collaborator Whether you re a CEO Chairman Manager Scientist or student you should be embarking on your own personal AI revolution but read this book before it s too late Dr Larry Marshall former Chief Executive CSIRO Chair US Chamber of Commerce in Australia and of Fortescue Innovation

Fundamentals of Device and Systems Packaging: Technologies and Applications, Second Edition Rao Tummala,2019-11-20 A fully updated comprehensive guide to electronic packaging technologies This thoroughly revised resource offers rigorous and complete coverage of microsystems packaging at both the device and system level You will get in depth guidance on the latest technologies from academic and industry leaders New chapters cover topics highly relevant to today s small and ultra small systems Fundamentals of Microsystems Packaging Second Edition discusses the entire field from wafer to systems and clearly explains every major contributing technology The book details emerging systems including smart wearables the Internet of Things bioelectronics for medical applications cloud computing and much more Microelectronics photonics MEMS sensors RF and wireless technologies are fully covered Covers the electrical mechanical

chemical and materials aspects of each technology Contains examples of all common configurations and technologies Written by the leading author in the field

Moving Towards Sustainable Development: Exploring the Impact of Land-Use Policies on Land Green Utilization Efficiency Shikuan Zhao,Cunyi Yang,Lingli Qing ,Chengqi Wang,2026-02-06 Amid the backdrop of rapid global economic expansion and increasing population the sustainable utilization of land resources has emerged as a critical issue of concern for governments and the academic community worldwide Land Green Utilization Efficiency an essential metric for assessing the quality of land resource usage is pivotal not only for the sustainable development of economies and societies but also for the protection and enhancement of ecological environments Land use Policies as significant governmental tools for regulating land resource utilization have an undeniable impact on Land Green Use Efficiency For instance in recent years China has implemented a range of Land use Policies such as the construction of high standard farmland and the return of farmland to forests profoundly affecting land market developments and altering land utilization methods thereby contributing to improved land green utilization efficiency However there is still a lack of systematic research and understanding of how these beneficial Land use Policies reshape land utilization patterns and systematically affect Land Green Utilization Efficiency This Research Topic is committed to establishing a theoretical and practical platform for systematically assessing both the direct and indirect impacts of land use policies on land green utilization efficiency thereby advancing the study and practical application of Land Use Policy Land Management and Sustainable Development It also aims to develop innovative solutions to the challenges posed by these policies by enhancing governmental and public awareness of their effects on Land Green Utilization Efficiency Consequently we invite contributions that apply novel theories concepts data analysis and evaluation methods to land and environmental management from perspectives that include governmental corporate and individual decision making change management strategies leadership and communication practices We welcome empirical and theoretical submissions as well as reviews of literature and interdisciplinary studies Among the topics of interest are the following Innovative methods for assessing the impact of land use policies on land green utilization efficiency Analyzing the Impact of Land use Policies on land use practical resilience Exploring the social and ecological consequences of land green utilization efficiency Analyzing the impact of Urban Expansion and Rural Land Consolidation Policies on Land Green Utilization Efficiency Exploring the impacts of Urban rural Land Policy synergy and interactions on Land Green Utilization Efficiency Evaluating the effects of land use adaptation policies under the pressure of Climate Change and Urbanization International case studies on sustainable Land use Policies and Land Green Utilization Efficiency Exploring the impact of urban rural land structure changes on Land Green Utilization Efficiency Spatial factor allocation of urban rural land and Land Green Utilization Efficiency Other related topics

Digital Twin Technology for Sustainable Agriculture Arun Lal Srivastav,Naveen Kumar,Inga Zinicovscaia,2026-03-03 This book explores into the future of agriculture where technology and sustainability intersect to revolutionize farming practices It

delves into the concept of digital twins virtual replicas of physical farm assets and processes and their transformative impacts on modern agriculture The book also highlights various applications of digital twin technology in agriculture from crop monitoring and soil health management to livestock productivity and precision irrigation Through detailed case studies real world examples and success stories this book showcases the tangible benefits of integrating digital twins into farming operations Moreover it also addresses the implementation strategies for adopting this technology including the integration of IoT sensors data collection and development of digital twin frameworks The authors conclude by discussing the technical operational and data privacy issues that farmers and agricultural technologists may encounter providing practical solutions to overcome these barriers in the agriculture sector This book is a suitable read for students academicians and researchers working at the intersect of agriculture and artificial intelligence

Pilot Analysis of Global Ecosystems Stanley Wood, Sara J. Scherr, 2000 Agricultural extent and agricultural land use changes Food feed and fiber Soil resource condition Water services Biodiversity Carbon services

Manufacturing Engineering Handbook, Second Edition Hwaiyu Geng, 2015-10-22 The new edition of this professional resource reveals how to optimize all aspects of the global manufacturing process to build the highest quality goods at the lowest price in the shortest possible time How can one apply technical and business knowledge to develop a strategic plan that delivers increased productivity quality sustainability reliability agility resilience and best practices with rapid time to production and value The answers are found in the fully updated new edition of Manufacturing Engineering Handbook The goal of this second edition is to provide the essential knowledge needed to build products with the highest quality at the lowest cost in the least amount of time by optimizing all aspects of the manufacturing process design development tools processes quality speed output safety and sustainability You will gain access to information on conventional and modern technologies manufacturing processes and operations management that will assist you in achieving these goals The book is written by a team of more than 100 internationally renowned manufacturing engineering experts and pared down from its original 1200 pages The new and vastly improved second edition is specifically designed to concisely and succinctly cover traditional manufacturing processes and advanced technologies as well as newer manufacturing software and systems to integrate them into the modern global manufacturing world Brand new chapters on eco design and sustainability nano materials and nano manufacturing facilities planning operations research New sections on plastics composites and moldmaking global manufacturing and supply chain management Increased coverage of Design for Six Sigma and adaptive manufacturing Affiliated web site with color illustrations graphs charts discussions on future trends additional technical papers and suggestions for further reading
