The 5x questions checklist for an effective hybrid workplace model

01

What do people want?

As mentioned above, a successful hybrid work strategy and hybrid workplace model can only work if it's designed to the people.

Before making any significant decisions or investments, it's important to understand the preferences, needs, and expectations of the people you want to work for.

The way to build a hybrid work model is to first understand what your employees want and need, and then design the model to meet those needs.

How do you know what your employees want? There are several ways to find out. You can conduct surveys, focus groups, and interviews. You can also look at data from your existing hybrid work model, if you have one.
