## **Sonderstab Musik:**

**Sonderstab Musik** Willem de Vries, 1996-01-01 During the Second World War the Einsatzstab Reichsleiter Rosenberg was set up an organisation which aimed for the elimination of Jewish cultural life in the rest of Europe A Sonderstab Musik was also established staffed by distinguished German musicologists whose task was to locate musical manuscripts books and instruments Its initial target was the possessions of Jewish musicians and composers who had fled the Nazi regime but in the end it boiled down to a general confiscation and removal of Jewish possessions including those connected with music making This book describes the activities of the Sonderstab Musik in France Belgium and the Netherlands *Music as Social and Cultural Practice* Melania Bucciarelli, Berta Joncus, 2007 The linking theme of the essays collected here is the intersection of musical work with social and cultural practice Inspired by Professor Strohm's ideas as is fitting in a volume in his honour leading scholars in the field explore diverse conceptualizations of the work within the contexts of a specific repertory over four main sections Music in Theory and Practice studies the link between treatises and musical practice and analyses how historical writings can reveal period views on the work in music before 1800 Art and Social Process Music in Court and Urban Societies looks at the social and cultural practices informing composition from the late Renaissance until the mid eighteenth century and interrogates current notions of canon formation and the exchange between local and foreign traditions Creating an Opera Industry focuses on how genre and artistic autonomy were defined in operas from diverse eras and countries explaining the role of literature and politics in this process Finally The Crisis of Modernity treats nineteenth century music offering new models for work and context to challenge reigning theories of the meaning of these terms Publisher's website **Music after Hitler, 1945-1955** Toby Thacker, 2017-07-05 The political control of music in the Third Reich has been analysed from several perspectives and with ever increasing sophistication However music in Germany after 1945 has not received anything like the same treatment Rather there is an assumption that two separate musical cultures emerged in East and West alongside the division of Germany into two states with differing economic and political systems There is a widely accepted view of music in West Germany as free and in the East subject to party control Toby Thacker challenges these assumptions asking how and why music was controlled in Germany under Allied Occupation from 1945 1949 and in the early years of semi sovereignty between 1949 and 1955 The re education of Germany after the Hitler years was a unique historical experiment and the place of music within this is explored here for the first time While emphasizing political economic and broader social structures that influenced the production and reception of different musical forms the book is informed by a sense of human agency and explores the role of salient individuals in the reconstruction of music in post war Germany The focus is not restricted to any one kind of music but concentrates on those aspects of music professional and amateur live and recorded which appeared to be the mostly highly charged politically to contemporaries Particular attention is given to denazification and to the introduction of international music Thacker traces the development of a divide between

Communist and liberal democratic understandings of the place of music in society The contested celebrations of the Bach Year in 1950 are used to highlight the role of music in the broader cultural confrontation between East and West Thacker examines the ways in which central governments in East and West Germany sought to control and influence music through mechanisms of censorship and positive support The book will therefore be of interest not only Collecting and Provenance Jane Milosch, Nick Pearce, 2019-10-28 The study of provenance the history of the creation and ownership of an artefact work of art or specimen provides insights into the history of taste and collecting illuminating the social economic and historic trends in which an object was created and collected It is as much a history of people as it is of objects and its study often reveals intricate networks of relationships patterns of activity and motivations This book promotes the study of the history of collecting and collections in all their variety through the lens of provenance and explores the subject as a cross disciplinary activity Perhaps for the first time in a publication it draws on expertise ranging from art history and anthropology to natural history and law looking at periods from antiquity through the 18th century and the Holocaust era to the present and materials from Europe and the Americas to China and the Pacific The issues raised are wide ranging touching on aspects of authenticity cultural meaning and material transformation and economic and commercial drivers as well as collector and object biography The book fills a gap in the study of collecting and provenance taking the subject holistically and from multiple standpoints better to reflect the widening interest in provenance from a range of disciplinary perspectives This book will be a service to the field from established scholars and museum professionals to students of collecting history cultural heritage and museum studies

**Chopin's Piano** Paul Kildea, 2018-08-14 An exceptionally fine book erudite digressive urbane and deeply moving Wall Street Journal Chopin's Piano traces the history of Frédéric Chopin's twenty-four Preludes through the instruments on which they were played the pianists who interpreted them and the traditions they came to represent Yet it begins and ends with Chopin's Mallorquin piano which the great keyboard player Wanda Landowska rescued from an abandoned monastery at Valldemossa in 1913 and which assumed an astonishing cultural potency during the Second World War as it became for the Nazis a symbol of the

man and music they were determined to appropriate as their own In scintillating prose and with an eye for exquisite detail Paul Kildea beautifully interweaves these narratives which comprise a journey through musical Romanticism one that illuminates how art is transmitted interpreted and appropriated over the ages The Return of Looted Collections (1946-1996) F. Gerard Aalders,2004 The Nazi looting machine was notoriously efficient during the Second World War In the Netherlands 8 5  
million citizens suffered losses estimated at 3 6 billion guilders Approximately one third of these losses were borne by Jews  
who comprised only 1 6% of the total population In todays terms the German occupiers stripped the Jewish population of  
assets worth 7 billion Nazi Looting offers a comprehensive history of the Dutch experience and demonstrates how reputable  
indigenous institutions acted as willing collaborators Beginning with a survey of international law and various definitions of  
looting the author shows how the Germans systematically robbed Dutch Jewry through a variety of means that gave the  
outward appearance of honest trading Forced to sell under duress and at unreasonably low prices few dared refuse the  
German on the doorstep when threatened with prison or incarceration in a camp The plundering was total and systematic In  
May 1940 a team of highly trained art historians linguists musicologists and literary experts arrived immediately behind the  
victorious German troops to catalogue the vast collections for Hitler From 1941 Jews were compelled to deposit all their  
money into a bank called Lippmann Rosenthal Co The name of the bank itself was a cynical ploy since it was taken from a  
respected Jewish owned Amsterdam bank and presented as a new branch This bank however simply channelled money into  
the Third Reich with the help of the Amsterdam Stock Exchange insurance brokers and other well established Dutch banks  
Once the Jews were deported their houses were emptied and the contents used to re furnish bombed out areas of the Reich  
In common with many other formerly Nazi occupied countries in Europe the Netherlands has been unable to retrieve many of  
its pre war assets More than fifty years after the wars end 20% of its most important pre war museum exhibits and  
approximately 80% of the less important works remain untrace **Neue Zeitschrift für Musik** ,2000 Archives of
