The Fishbowl Principle Gendelman,Miller,Taus,2009-12 At the core it doesn't matter what you believe governs the fate of man and Earth what matters is that humans as a global society build a future that is sustainable and peaceful This is the ultimate human evolutionary development this is our challenge By tracing our existence from where we began to what we have become today this book explores the evolution and should we continue on our current path the subsequent possible obsolescence of human beings Far from a doomsday tome *The Fishbowl Principle* challenges readers to expand their worldview We need to change our measure of a successful life from simply existing to prospering The authors refuse to accept that life as we exist today is as good as it gets We argue that humans have reached a fragile tipping point and that instead of fragmenting and isolating ourselves in a future of despair we can and will work together to an even higher apex As a human race we examine what can be achieved if we look to our similarities instead of our differences If we could harness communication as a powerful and cost effective tool to bring us together and educate ourselves in a way that fosters sustainable and responsible population growth the positive transformation to our lives would be immeasurable Whether you exist today as a peasant in a tribal setting or as an urban dweller we explore fostering a sense of global community based on common ground not just niche existence We present tangible alternatives and pose thought provoking questions Our vision is a collaborative one and requires your participation A path back to evolution starts with you and includes all of us
