The Microchip Revolution World Of Computers:

The Microchip Revolution David J. Darling, 1986 A brief history of the development of the computer leading to the invention of the microchip and a description of the current and future revolution in microelectronics [The Chip](#) T.R. Reid, 2001-10-09 Barely fifty years ago a computer was a gargantuan vastly expensive thing that only a handful of scientists had ever seen The world's brightest engineers were stymied in their quest to make these machines small and affordable until the solution finally came from two ingenious young Americans Jack Kilby and Robert Noyce hit upon the stunning discovery that would make possible the silicon microchip a work that would ultimately earn Kilby the Nobel Prize for physics in 2000 In this completely revised and updated edition of [The Chip](#) T R Reid tells the gripping adventure story of their invention and of its growth into a global information industry This is the story of how the digital age began

Robots and the Intelligent Computer David J. Darling, 1986 Discusses ways computers are becoming more intelligent to the point that they will soon understand and respond to human speech [The Chip](#) T. R. Reid, 2001-10-01 Throughout the 1950s engineers were stymied by the problem of how to connect the thousands of circuits that a sophisticated computer would require The solution finally came from two ingenious young Americans Jack Kilby and Robert Noyce Independently each had hit upon the stunning Monolithic Idea which became the silicon microchip [The Chip](#) tells the scientific and entrepreneurial adventure story of their discovery and of its growth into a global information industry that transformed and continues to transform our world [The Compleat Computer](#) Dennie Van Tassel, Cynthia L. Van Tassel, 1983

Electronic Technology, Corporate Strategy, and World Transformation Maurice Estabrooks, 1995-05-23 How are the new electronic technologies transforming business here and abroad indeed the entire world economy and what new strategies must business develop to meet the challenges of this transformation Economist writer and communications executive Maurice Estabrooks provides a readable comprehensive survey of how businesses are using microchips computers and telecommunications to reshape the entire world of work its cultures organization and economic systems With insight and impeccable scholarship he provides concrete evidence of the emergence of artificially intelligent cybernetic network based entities that are creating new linkages between businesses markets and technology itself linkages that will profoundly affect the way businesses create and implement their corporate survival and growth strategies in the future Drawing on the work of economic theorist Joseph Schumpeter Estabrooks shows how Schumpeterian dynamics have played a key role in the breakup of AT T and the Bell System and in the deregulation of telecommunications broadcasting banking finance and other economically critical industries What has emerged he maintains is an increasingly integrated global information and software based services economy Optical fibers satellites and wireless communications systems have already made possible the development of electronic superhighways but in doing so they have also initiated a massive redistribution of economic power and wealth throughout the world the implications of which are only now being understood Historical analytical descriptive Estabrooks book will speak not only to academics and others who

observe world transformations from relatively theoretical perspectives but also to corporate and other executives whose organizations and certainly their personal work lives will be changed dramatically by the developments he describes in practical day to day situations
