The Migrations Of Hawks:

The Migrations of Hawks Donald S. Heintzelman, 1986-10-22 There are forty species of hawks in North America including vultures the California condor and the bald eagle our national bird Heintzelman's monumental study is a comprehensive survey of what we know about the migrations of these magnificent birds in North America Central America and the West Indies After a general introduction on migration season speeds and methodology eleven detailed chapters survey migration routes and statistics in all the following regions eastern and western Canada the Great Lakes area New England the Middle Atlantic states southern Appalachia the Gulf Coast the Central states Western states Central America and the West Indies Subsequent chapters deal with the influence of weather systems and local weather variables updrafts thermals altitudes and the daily rhythm of migrations the influence of age and geography and the role of hawk counts as indices to population trends

Autumn Hawk Flights Donald S. Heintzelman, 1975 *Flight Strategies of Migrating Hawks* Paul Kerlinger, 1989 Hawks fly at very high altitudes sometimes over water and thus their flight behavior and migration patterns are extremely difficult to study Now based on nearly ten years of research this book provides the most complete analysis to date of how hawks migrate Paul Kerlinger has employed both direct observations and radar techniques to obtain a much more accurate understanding of the migratory behavior of hawks and the decisions they make in flight And he has integrated data on the flight behavior of raptors in general with information about their ecology physiology evolution and nonmigratory behavior Kerlinger begins with an overview discussing ecology and geography research methods natural history and evolution and atmospheric structure He then addresses specific aspects of flight behavior aerodynamics morphology mechanics direction altitude flocking water crossing speed selection daily distance traveled and flight strategies Kerlinger describes each aspect of behavior quantitatively testing mechanistic hypotheses In conclusion he examines how migrants integrate these behavioral components Throughout the text he draws comparisons between the migratory flight behavior of hawks and that of other taxa By means of such comparisons researchers can gain insight into the selective pressures that shape the behavior of migrant species
