Theistic Evolution:

A Biblical Case against Theistic Evolution Wayne Grudem, 2022-03-21 Leading Bible Scholars Explore Why the Theory of Theistic Evolution Conflicts with Christian Doctrine Even Christians strongly debate Scripture's account of creation with some declaring that major events in the book of Genesis from the origin of Adam and Eve to God's curse on the world were purely symbolic Several respected scholars endorse this theory but is it consistent with the Bible's teaching In *A Biblical Case against Theistic Evolution* condensed and adapted from *Theistic Evolution* Wayne Grudem and other leading scholars challenge the belief that Genesis is mostly symbolic rather than a true historical narrative Grudem examines 12 specific events in Genesis 1-3 and explains why acknowledging their historicity is critical to understanding the rest of Scripture He also emphasizes several foundational doctrines including God's ongoing involvement in creation the beginnings of mankind and the origin of sin and death to show readers how the theory of theistic evolution undermines essential truths throughout the Old and New Testaments *Defends the Biblical Account of Creation* Explains why theistic evolution is incompatible with the teachings of the Old Testament Written by Leading Theological Scholars Contributors include John D Currid Guy Prentiss Waters Gregg R Allison and Fred G Zaspel *An In Depth Look at Genesis* Examines 12 key biblical events in the first 3 chapters of the Bible *Helpful Condensed Guide* Adapted from *Theistic Evolution* A Scientific Philosophical and Theological Critique [Shadow of Oz](#) Wayne D. Rossiter, 2015-10-21 In the century and a half since Darwin's *Origin of Species* there has been an ongoing and often vociferously argued conversation about our species place in creation and its relationship to a Creator A growing number of academic professionals see no conflict between Darwin's view of life and the Christian faith Dubbed theistic evolution this brand of Christianity holds that God has used processes like Darwinian evolution to achieve his creation But is that true Can Darwin's mechanism of natural selection acting on chance mutations be reconciled with God's intentionality in producing particular outcomes Does humanity represent the apex of his creation or just an erasable and ephemeral signpost along a path still being revealed Does theistic evolution permit God to intervene supernaturally in the workings of his creation Can we as humans be made in the image of God if we are just one of the millions of products of evolution Can we salvage concepts like freewill meaning purpose or an eternal soul within theistic evolution In this book Wayne Rossiter assess theistic evolution and whether or not it is consistent with Christianity and secular science His conclusion is that it bears little resemblance to classical Christianity and promotes a century old understanding of evolutionary theory Theistic evolution renders God a passive player in creation so far removed and undetectable that he resembles a mere shadow of the Creator described in Christianity **The Creation-evolution Controversy** R. L. Wysong, 1976 Who has not wondered about the origin of the universe and life And for certain this is a question that should be taken with the utmost seriousness and sense of duty After all how can we know why we are here or what we should be doing if we do not know where we came from Although religions have their belief creation and materialists have their belief

evolution beliefs are not what truth is about This is a book of daring adventure between these two emotionally charged belief systems Rather than advocate Dr Wysong pits one belief against the other using the only weapons that should be used if truth is the objective reason and evidence Dr Wysong s rational philosophic and scientific probings make this book a reservoir of thoughtful and factual information that will not draw dust on your bookshelf Now in its thirteenth printing this seminal 1975 book has been read worldwide is widely cited on the web and continues to be used in schools It has helped lay the groundwork for a rational dialogue between religion and science and remains current to this day because of its even handed treatment of the subject and because reason should never fall out of fashion *A Theology for the Church* Daniel L. Akin,2007 Leading Baptist and evangelical thinkers examine eight key Christian doctrines shaping a church theology that is both biblically sound and relevant today **Three Views on Creation and Evolution** Zondervan,2010-06-01 For Christians the issues raised by the different views on creation and evolution are challenging Can a young earth be reconciled with a universe that appears to be billions of years old Does scientific evidence point to a God who designed the universe and life in all its complexity *Three Views on Creation and Evolution* deals with these and similar concerns as it looks at three dominant schools of Christian thought Proponents of young earth creationism old earth creationism and theistic evolution each present their different views tell why the controversy is important and describe the interplay between their understandings of science and theology Each view is critiqued by various scholars and the entire discussion is summarized by Phillip E Johnson and Richard H Bube The Counterpoints series provides a forum for comparison and critique of different views on issues important to Christians Counterpoints books address two categories Church Life and Bible and Theology Complete your library with other books in the Counterpoints series **Systematic Theology, Second Edition** Wayne A. Knowledge and Evolution Michael Chaberek,2021-08-31 The question of the origins of the universe is probably one of the most dwelled upon and argued about over the last couple of centuries Ever since Charles Darwin proposed his theory evolutionists and creationists want to settle the issue on their sides But science did not stop at Darwin s time It progressed enormously creating significant problems for Darwinian explanations Is there a better answer than the dominant neo Darwinian synthesis Even more fundamental is the question of whether natural science by itself can explain the origins of nature What are the limits of science and where should we turn to philosophy and theology How do these three domains science philosophy and theology relate when addressing the question of origins Theistic evolution the idea of God using evolution as a means of creating the universe faces problems from both classic Christian theology as well as classic metaphysics Today things do not look good for the dominant views The time has come to propose a new faith and science synthesis one that offers a serious approach to the Bible on the one hand and an honest look at biological findings on the other This book sets a path to such a new synthesis
