Theology and Science in Mutual Modification Harold P. Nebelsick, 1981      **Theology and Science in Mutual Modification** Harold P. Nebelsick, 1981      **Reality and Scientific Theology** Thomas F. Torrance, 2001-11-28 In this book the author argues for a rigorous scientific theology under the double constraint of the reality of God and the reality of the world of space and time Careful attention is given to the common commitment of theological and natural science to objective knowledge and the deeply natural relation between knowledge of God the Creator and knowledge of the world he has made Stress is laid upon the stratified structure of theology and the need for a radical simplification and unification of Christian doctrine Is theology the science of God and is it concerned with objective knowledge like natural science Is there a natural theology and how is it related to knowledge of God through divine relation How is the community of faith within which dogmatic theology arises related to the social coefficient of scientific inquiry What is the place of mysticism and of art in theology Does theology have a special notion of truth and does it have its own inner logic and structure These are some of the main questions which this book seeks to answer      *Creation, Catastrophe & Calvary* John Templeton Baldwin, 2000 In this scientific age what difference does it make whether I believe the world was created in six literal days and that the world was destroyed by a global flood In answering these questions *Creation Catastrophe and Calvary* shows how these beliefs are related to key issues such as the forgiveness of our sins and Sabbath observance Foreword Introduction Meet the Authors An Angel's Worldview The Days of Creation in Genesis 1 A Second Creation Account Biblical Evidence for the Universality of the Genesis Flood The Grand Canyon and the Genesis Flood The Geologic Column and Calvary The Rainbow Connection Implications for an Evangelical Understanding of the Atonement Evolution A Theory in Crisis The Role of Creation in Seventh day Adventist Theology Science and Theology Focusing the Complementary Lights of Jesus Scripture and Nature

**Describing the Hand of God** Robert Brennan, 2016-04-28 The question of divine agency in the world remains one important unresolved underlying obstacle in the dialogue between theology and science Modern notions of divine agency are shown to have developed out of the interaction of three factors in early modernity Two are well known late medieval perfect being theology and the early modern application of the notion of the two books of God's revelation to the understanding of

the natural order It is argued the third is the early modern appropriation of the Augustinian doctrine of inspiration This assumes the soul's existence and a particular description of divine agency in humans which became more generally applied to divine agency in nature Whereas Newton explicitly draws the parallel between divine agency in humans and that in nature Darwin rejects its supposed perfection and Huxley raises serious questions regarding the traditional understanding of the soul This book offers an alternative incarnational description of divine agency freeing consideration of divine agency from being dependent on resolving the complex issues of perfect being theology and the existence of the soul In conversation with Barth's pneumatology this proposal is shown to remain theologically coherent and plausible while resolving or avoiding a range of known difficulties in the science theology dialogue
