Truth From Trash How Learning Makes Sense:

Truth from Trash Chris Thornton, 2002 Chris Thornton makes the compelling claim that learning is not a passive discovery operation but an active process involving creativity on the part of the learner This study of learning in autonomous agents offers a bracing intellectual adventure Chris Thornton makes the compelling claim that learning is not a passive discovery operation but an active process involving creativity on the part of the learner Although theorists of machine learning tell us that all learning methods contribute some form of bias and thus involve a degree of creativity Thornton carries the idea much further He describes an incremental process recursive relational learning in which the results of one learning step serve as the basis for the next Very high level recordings are then substantially the creative artifacts of the learner's own processing Lower level recordings are more objective in that their properties are more severely constrained by the source data Thornton sees consciousness as a process at the outer fringe of relational learning just prior to the onset of creativity According to this view we cannot assume consciousness to be an exclusively human phenomenon but rather the expected feature of any cognitive mechanism able to engage in extended flights of relational learning Thornton presents key background material in an entertaining manner using extensive mental imagery and a minimum of mathematics Anecdotes and dialogue add to the text's informality

The Logic of Adaptive Behavior Martijn van Otterlo, 2009 Markov decision processes have become the de facto standard in modeling and solving sequential decision making problems under uncertainty This book studies lifting Markov decision processes reinforcement learning and dynamic programming to the first order or relational setting

AI Margaret A. Boden, 2016-05-19 The applications of Artificial Intelligence lie all around us in our homes schools and offices in our cinemas in art galleries and not least on the Internet The results of Artificial Intelligence have been invaluable to biologists psychologists and linguists in helping to understand the processes of memory learning and language from a fresh angle As a concept Artificial Intelligence has fuelled and sharpened the philosophical debates concerning the nature of the mind intelligence and the uniqueness of human beings Margaret A Boden reviews the philosophical and technological challenges raised by Artificial Intelligence considering whether programs could ever be really intelligent creative or even conscious and shows how the pursuit of Artificial Intelligence has helped us to appreciate how human and animal minds are possible

[Evil Media](#) Matthew Fuller, Andrew Goffey, 2012-08-17 A philosophical manual of media power for the network age *Evil Media* develops a philosophy of media power that extends the concept of media beyond its tried and trusted use in the games of meaning symbolism and truth It addresses the gray zones in which media exist as corporate work systems algorithms and data structures twenty first century self improvement manuals and pharmaceutical techniques *Evil Media* invites the reader to explore and understand the abstract infrastructure of the present day From search engines to flirting strategies from the value of institutional stupidity to the malicious minutiae of databases this book shows how the devil is in the details The title takes the imperative Don't be evil and asks what would be done any

differently in contemporary computational and networked media were that maxim reversed Media here are about much more and much less than symbols stories information or communication media do things They incite and provoke twist and bend leak and manage In a series of provocative stratagems designed to be used Evil Media sets its reader an ethical challenge either remain a transparent intermediary in the networks and chains of communicative power or become oneself an active transformative medium
