The Cambridge Companion to Schoenberg Jennifer Shaw, Joseph Auner, 2010-05-13 Arnold Schoenberg composer theorist teacher painter and one of the most important and controversial figures in twentieth century music This Companion presents engaging essays by leading scholars on Schoenberg's central works writings and ideas over his long life in Vienna Berlin and Los Angeles Challenging monolithic views of the composer as an isolated elitist the volume demonstrates that what has kept Schoenberg and his music interesting and provocative was his profound engagement with the musical traditions he inherited and transformed with the broad range of musical and artistic developments during his lifetime he critiqued and incorporated and with the fundamental cultural social and political disruptions through which he lived The book provides introductions to Schoenberg's most important works and to his groundbreaking innovations including his twelve tone compositions Chapters also examine Schoenberg's lasting influence on other composers and writers over the last century

Classification and Clustering in Business Cycle Analysis Ullrich Heilemann, Claus Weihs, 2007-01-18 The analysis of cyclical macroeconomic phenomena is an important field of econometric research In the recent past research interests have de emphasized quantitative forecasting exercises and have addressed the qualitative diagnosis of the relative stance of the economy regarding upswing recession or boom periods i e the classification of the state of the economy into a limited number of discrete states In this context the principal challenge is to reduce the multifaceted and sometimes abundant quantitative information about the business cycle to such qualitative statements in an efficient way For more than six years this task was the focus of the project Multivariate determination and analysis of business cycles within the SFB 475 Reduction of complexity in multivariate data structures funded by the German Research Foundation DFG The necessity for complexity reduction is of course not unique to business cycle analysis but is studied in many fields and in a number of ways This broad interest in the reduction of problem dimensionality and in the appropriate combination of data and of theory caused the RWI Essen and the Statistical Department of the University of Dortmund in January 2002 to hold a workshop at the RWI Essen where the findings of this and similar projects were presented and discussed The present publication collects revised versions of the papers presented at this workshop Although the workshop took place some five years ago these papers mark an important juncture in the development of business cycle research

Praxis of Retelling Parables and Miracles Beschi Jeyaraj,2023-02-09 A bible theological didactic is not principally reduced to learning and teaching Bible alone but rather extended to understanding and interpreting Bible in one s own religious and pedagogical context Bible didactic moreover does not circumscribe itself only to biblical knowledge in virtue of deducing some abstract and moral principles but it rather prospects to strengthen and reconstruct one s identity within the choices offered by culture and context This book aims to engage in an intercultural interpretation of the parables and the miracles of Jesus by dialoging with the culture of Tamils This comparative study subsequently proposes an alternative synchronic hermeneutic in biblical didactics replacing a deep seated diachronic model in Tamil land It also develops a model of sync curation superseding fossilised model of inculturation This book capitalises Tamils texts and narratives of masses reflected in the archives of Tamil literatures and legends in the process of theologisation Bearing on the aesthetics of parables and miracles and contextual reading of them this study brings forward the world in front of the text leaving behind the conventional exegesis of the world behind the text

Schenker and Schoenberg on the Tone and the Genius Matthew Arndt,2008 [Texts and Identities in the Early Middle Ages](#) Richard Corradini,2006 For seven years a collaboration between the Institute for Medieval Studies of the Austrian Academy of Sciences and the Universities of Utrecht Cambridge Leeds and Paris I Sorbonne provided the opportunity for young researchers to discuss and coordinate their work The title of the project and of this volume Texts and identities provides the framework for case studies in different fields of early medieval history They include apparently disparate topics such as historiography and hagiography monastic spaces and memories lay and ecclesiastic legislation as well as liturgy and penance Rather than defining a common field of research the meetings from which these papers have emerged derived their coherence from their common methodological framework This approach combines two elements on the one hand emphasis has been laid on the careful analysis of the transmission of texts and of the manuscript evidence on the other research has

focused on the problem of identity or rather of processes of identification including the perception of differences between specific social political and religious communities In the combination of these two approaches the extant texts from the early medieval period are not only seen as mere reflections of ethnic social and cultural identities but also as media that gave meaning to social practices and were often intended to inspire guide change or prevent action directly or indirectly The written texts that have been transmitted to us can be seen as part of a cultural effort to shape the present by means of restructuring the past The often discordant voices of medieval authors allow modern historians to grasp something of the multiplicity of the early medieval world and of the disagreements conflicts idiosyncrasies and individual perceptions among the people who lived in that period Many contributions in this volume propose specific methods for studying changing identities They analyse differences between similar texts over time or specifically changes in texts in the course of their transmission The papers collected in this volume illustrate that texts were integral parts of a world in transformation
