

Vectors are the same if they have the same direction and magnitude.

A negative vector has the same magnitude but is in the opposite direction.

A vector can be multiplied by a scalar to make it shorter or longer or reverse the direction.

Vectors can be added together to create a pathway from one point to another.

$$\overline{AC} = a + b$$

Two vectors are parallel if one is a multiple of the other.

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
