## **Some Other Rainbow:**

Some Other Rainbow JOHN. MORRELL MCCARTHY (JILL.), Jill Morrell, 2017-07-17 On 17 April 1986 John McCarthy was kidnapped in Beirut For the next five years he was cut off from everything and everybody he knew and loved from family friends and perhaps above all from Jill Morrell the girl he was going to marry For five years John McCarthy had to endure the deprivation both physical and psychological of captivity the filth and squalor of the cells in which he was kept the agony of isolation and repeated self examination and the pain of ignorance of not knowing if those he loved even realized he was alive For Jill Morrell the five years of John s captivity were a different kind of hell the initial shock and disbelief the gradual acceptance that John had been taken and that her life had changed irrevocably that all their plans had been shattered But Jill refused to give up hope For five years she and a group of friends worked ceaselessly on behalf of John and all British hostages in the Middle East until the extraordinary day in August 1991 when John McCarthy stepped down from an aeroplane at RAF Lyneham A day when they could begin again This is their story a remarkable account of courage endurance hope and love

**Some Other Rainbow** John McCarthy, 1998-12 On April 17 1986 John McCarthy a British television journalist was kidnapped in Beirut and held for 5 years During those years he lived in squalor and was cut off from everybody he knew and loved including Jill Morrell the girl he was going to marry For Jill the 5 years of John s captivity were a different kind of hell the initial shock and horror and then the gradual acceptance that all their plans had been shattered For 5 years she battled with the mandarins of the Foreign Office and worked ceaselessly on behalf of all the British hostages in the Middle East until the extraordinary day in August 1991 when John McCarthy stepped down from an aeroplane at RAF Lyneham

Some Other Rainbow. Large Print John McCarthy, Jill Morrell, 1993 *Annual Report* Oregon State Horticultural Society, 1909 *Rainchild & The River of Kings* Janeiro Star, 2013-07-15 Strewn underneath the photos are eight pieces of torn crumpled paper of a light green color with black marker scribbles in a clear zip bag This is really weird Suray says to herself She needs to piece up the papers together in order to read the torn scribbles Those crumpled pieces need to be unraveled and smoothed out by one The patching up of the pieces is time consuming She has to get up to her room to find cellophane tape Eventually the patched up pieces bear these wordings Meet me near the bridge If we were really destined to meet I ll be by the river Well well well what is that supposed to mean It feels frustratingly crappy Where on earth could the bridge be On top of all that there are so many rivers in the world Who wrote this in the first place It didn t seem like a recognizable handwriting to Suray Why did the mysterious writer tear the paper into pieces yet keep it in a trunk like a cherished possession Everything just doesn t make sense The writer tore the paper to some pieces as if to diminish a secret yet decide not to eliminate it To whom actually the message on the torn paper is intended If the writer is her father it is too late to pursue any possible meet up because he s dead Perished in the fire by the river of Siam was as told by his uncle Razief who happens to be her father s twin brother In silence she couldn t help feeling and thinking that there is a tiny weeny

ounce of possibility that her father is somehow still roaming the Earth

**The Unwritten Laws of Engineering** W.J. King, Some years ago the author became very much impressed with the fact which can be observed in any engineering organization that the chief obstacles to the success of individual engineers or of the group comprising a unit were of a personal and administrative rather than a technical nature It was apparent that both the author and his associates were getting into much more trouble by violating the unwritten laws of professional conduct than by committing technical sins against the well documented laws of science Since the former appeared to be indeed unwritten at that time as regards any adequate and convenient text the following laws were originally formulated and collected into a sort of scrapbook to provide a set of house rules or a professional code for a design engineering section of a large manufacturing organization Although they are admittedly fragmentary and incomplete they are offered here for whatever they may be worth to younger men just starting their careers and to older men who know these things perfectly well but who all too often fail to apply them in practice Just a few points should be emphasized None of these laws is theoretical or imaginary and however obvious and trite they may appear their repeated violation is responsible for much of the frustration and embarrassment to which engineers everywhere are liable In fact this paper is primarily a record derived from direct observation over a period of seventeen years of the experience of four engineering departments three of them newly organized and struggling to establish themselves by the trial and error method It has however been supplemented and confirmed by the experience of others as gathered from numerous discussions lectures and the literature so that it most emphatically does not reflect the unique experience or characteristics of any one organization Furthermore many of these rules are generalizations to which exceptions will occur in special circumstances There is no thought of urging a slavish adherence to rules and red tape for there is no substitute for judgment and at times vigorous individual initiative is needed to cut through formalities in an emergency But in many respects these laws are like the basic laws of society they cannot be violated too often with impunity notwithstanding striking exceptions in individual cases
