## **The Maya:**

*The Maya* Matthew Restall, Amara Solari, 2020 The Maya forged the greatest society in the history of the ancient Americas and one of the great societies in human history Long before contact with Europeans Maya communities built spectacular cities created complex agricultural systems mastered the visual arts and developed a sophisticated writing system that recorded extraordinary knowledge in calendrics mathematics and astronomy All that was achieved without area wide centralized control For there was never a single unified Maya state or empire but always numerous evolving ethnic groups speaking dozens of distinct Mayan languages The people we call Maya never thought of themselves as such so what was their self identity and how did Maya civilization come to be invented Yet something definable unique and endlessly fascinating what we call Maya culture has clearly existed for millennia With the Maya subdivided in so many ways geographical linguistic and chronological the pursuit of what made the Maya the Maya is all the more important In this Very Short Introduction Restall and Solari explore the themes of Mayan self identity polity or city state political culture and cosmivision and the world beyond ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

**The Maya** Naida Kirkpatrick, 2003 Shows how the ancient Mayan people lived by describing their social economic political religious and cultural life and looks at how archaeologists learn about ancient civilizations

*The Maya* Michael D. Coe, Stephen Houston, 2023-06-06 The definitive history of the Maya fully updated with the latest archaeological studies and featuring full color illustrations The Maya has long been established as the best most readable introduction to the ancient Maya by experts Michael D Coe and Stephen Houston In this new edition this classic has been updated by distilling the latest scholarship for the general reader and student This edition incorporates the most recent archaeological and epigraphic findings which continue to proceed at a fast pace along with full color illustrations The new material includes evidence of the earliest human occupants of the Maya region and the beginnings of agriculture and settled life analysis from lidar on swampy areas such as Usumacinta that show enormous rectangle earthworks including Aguada Fenix dating from 1050 to 750 BCE and recent advances in decoding Maya writing and imagery This revised edition also expands information on the roles of women courtiers and outsiders covers novel research about Maya cities including research into water quality marketplaces fortifications and integrated road systems and includes coverage of more recent Maya including their displacement and mistreatment along with growing affirmations of their cultural identity and legal rights The Maya highlights the vitality of current scholarship about this brilliant culture

**Maya Forest Waterlands** Hanna Laako,Edith Kauffer,2025-02-12 This book examines the entanglements and blurred edges of nature conservation and geopolitical relations in the borderlands of the trinational Maya Forest Maya Forest is an umbrella term for transboundary conservation developed by scientists and conservationists in the 1990s to protect the threatened rainforest in the borderlands of Mexico Belize and Guatemala Currently the Maya Forest is a biodiversity hotspot composed of a network of protected areas and heritage sites However issues related to water land and forests have often been treated as separate political units and not as part of the same history Written by two authors with decades of hands on experience in this region this book sheds light on the complex dynamics by which conservation and natural resource management geopolitically shape borderlands such as the Maya Forest The book introduces the novel concept of forest waterlands as borderlands and fluid edges which are now subject to concern by conservationists These are entangled spaces in which conservation peoples and politics interact connect and disconnect with the nexus of waters forests and lands The book sheds light on the building and mapping of the Maya Forest ecoregion with particular attention to water as an often

neglected but unifying element It showcases how the Maya Forest is a distinct region characterized by transformations entangled with the Maya trails of biological stations the shared history of chicleros chewing gum hunters fluid international rivers and transboundary basins and various geopolitical discrepancies It offers a contemporary glimpse into the Maya Forest s intertwined bio and geopolitics which urge us to rethink borders and boundaries This book will be of great interest to students and scholars of nature conservation global environmental politics geopolitics borderlands international relations and natural resource management
