The Penguin Handbook:

The Penguin Handbook Lester Faigley, 2003 In The Penguin Handbook Faigley rethinks the way handbooks present information and ideas with a reference that is tailored for today's visually and technologically oriented students. Drawing on student feedback and a wealth of classroom experience to design a handbook that gives students the information they need in a format they will actually use. The Penguin Handbook addresses the changing nature of today's students as well as today's writing assignments. This text uses unique at a glance documentation pages to help students visually understand how to cite sources while Common Errors boxes for grammar and style help students identify the building blocks necessary for academic writing so that they can successfully employ them in their work. Additional visuals throughout the text help students with everything from how to construct a descriptive paragraph to understanding how visual information can be used in a paper presentation or Website. The Penguin Handbook makes major advances over existing handbooks by broadening the context of communication including concise practical discussions of verbal and visual texts as well as detailed coverage of writing in its many forms. While an emphasis on the process of academic writing and research is maintained throughout the book and its Website also include coverage of non-fiction genres brochures magazine articles and letters of application that are used more typically outside the classroom. In addition The Penguin Handbook is the first handbook to combine this coverage with three purposes of writing reflective informative and persuasive writing. Throughout Lester Faigley's expertise in matters relating to technology is consistently evident including integrated references to the text's comprehensive and meticulously constructed Web site. This site extends the interactive nature of the text by providing self-scoring exercises linked to the Common Error boxes ESL Worksheets for non-native speakers Writing in the World projects linked to the writing process chapters and more. On everything from Internet research and documenting online sources to cutting edge chapters on writing for the Web and creating visuals for papers and oral presentations.
