

A large, dark, jagged rock formation, possibly a meteorite or a piece of a celestial body, is shown floating in space. The rock is highly textured and appears to be composed of multiple dark, angular fragments. It is positioned in the upper left and center of the frame, with a long, thin, dark beam of light or a narrow channel extending from it towards the right. The background is a deep blue and black space filled with numerous small, bright stars. In the lower right, the curved horizon of a planet is visible, showing a thin layer of atmosphere and a bright, glowing blue-green light source, likely the sun or a star, creating a lens flare effect.
