

# THE FUTURE LONDON

## TRANSPORT

The Government will close central London to Cars, vans and taxis. A complex cycle car system will provide all deliveries to shops, home and restaurants. Trams will provide transport for citizens of London. Every resident in Greater London will be given a free bike to help for transport. Outside Central London, cars will be allowed but only electric cars. Buses and taxis are now 100% electric and are part of the fleet!

③ The Government will give every household a smart meter installed to a device to provide energy use data.

① ENERGY  
The Government will fund the installation of solar panels on every single roof of a building in London!

② Several fast waterways will harness the energy from the river Thames. This will provide electricity for the whole city.

The largest meat processor company in the world (JBS) produces around half the carbon emissions of just fast food giant McDonald's and 80% their farms are destroyed to produce industrial meat. Billions of tons of CO2 are released into the atmosphere and 80% of accelerating global warming.

## POPULATION

The Government will push a plan to ensure that every couple in the country to have a maximum of two children.

## VEGANS

If everyone ate a plant based diet, we'd save 40% less from land than we use today. That's equivalent to the U.S.A, China, Europe and Australia combined.

PLANTAINS  
75% of the UK's greens get smothered and are soggy with too many oils, preservatives, bread, pasteurized, fruits, cereals and grains.

Let's move beekeeping back!

## FOOD

Companies will give every family money to go their own fruit and veg. For those that do not have gardens, the government will give them loaned out hanging baskets. The purchase of meat is illegal. This is because large areas of deforestation in South America are being done to Amazon rainforest in order to provide space for cattle to graze. The mass production of meat produces more is causing huge damage to the environment. It's not a big of the planet being right of the future now!

**Four Centuries of Special Geography** O.F.G. Sitwell, 2011-11-01 Geography as an academic discipline dates back to the last few decades of the nineteenth century. However, during the preceding centuries a large body of English language literature relevant to the field of special geography was published. *Four Centuries of Special Geography* lists all the works published before 1888 and includes descriptions of each entry and notes on later editions. Francis Sitwell has written an extensive introduction in which he provides a detailed guide to the organization and contents of the bibliography. He also evaluates special geography as a genre which contributed to scholarly discourse from the sixteenth to the nineteenth centuries. In addition, he examines the genre as a whole and discusses its relation to the evolving world of ideas during the same time period. The result of several years of data gathering, this book will be a valuable research tool for anyone seeking to examine aspects of the development of the field of geography in the years before it was defined as a distinct academic discipline. It will also be useful to those whose research focuses on the acquisition and transmission of geographical knowledge prior to the twentieth century, in particular on the place of geography in educational curricula.
