laughing so poorly When you take self portraits do you always laugh unnaturally in the photo So don t you like to share your  
smiles or photos with everyone There are many muscles in the face as there are in the body The activity of speaking and  
smiling makes use of only a small fraction of the muscles in the face not more than about 30 percent The muscles that are not  
in use begin to wane and fade away especially as one begins to age The truth of the matter is that a good smile makes one  
look years younger than his or her age because there is more use made of the muscles and for a longer period of time This  
increases blood flow around the parts that make up the face to keep that part healthy and youthful However there are special  
techniques that can be used both to get the facial expression that is required and to improve smile quality The training makes  
the muscles flexible and not rigid to make the smile natural and less of plastic Some of these techniques are as follows to
