*Source Book in Astronomy* Harlow Shapley,1969      **Source Book in Astronomy, 1900-1950. H Shapley, Editor.**  
**[With Illustrations.]** Harlow SHAPLEY,1960      **Sources Book in Astronomy** Harlow Shapley,1969      *The Synthesis of the Elements* Giora Shaviv,2012-04-13 This book describes the origins and evolution of the chemical elements we and the cosmos are made of The story starts with the discovery of the common elements on Earth and their subsequent discovery in space How do we learn the composition of the distant stars How did progress in quantum theory nuclear physics spectroscopy stellar structure and evolution together with observations of stars converge to provide an incredibly detailed picture of the universe How does research in the micro world explain the macro world How does progress in one affect the other or lack of knowledge in one inhibit progress in the other In short Shaviv describes how we discovered the various pieces of the jigsaw that form our present picture of the universe and how we sometimes put these in the wrong place before finding in the right one En route we meet some fascinating personalities and learn about heated controversies Shaviv shows how science lurched from one dogma to the next time and again shattering much of what had been considered solid knowledge until eventually a stable understanding arose Beginning with generally accepted science the book ends in today s terra incognita of nuclear physics astrophysics and cosmology A monumental work that will fascinate scientists philosophers historians and lay readers alike      *Modern Theories of the Universe* Michael J. Crowe,1994-01-01 This book provides an introduction to the fundamentals of stellar astronomy a history of astronomy and an account of how the science of astronomy challenged traditional philosophical and theological beliefs Throughout the text are readings from the writings of scientists who contributed most significantly to the development of astronomy      **Chasing Hubble's Shadows** Jeff Kanipe,2007-01-23 Chasing Hubble s Shadows is an account of the continuing efforts of astronomers to probe the outermost limits of the observable universe The book derives its title from something the great American astronomer Edwin Hubble once wrote Eventually we reach the dim boundary the utmost limits of our telescopes There we measure shadows and we search among ghostly errors of measurement for landmarks that are scarcely more substantial The quest for Hubble s shadows those unimaginably distant wispy traces of stars and galaxies that formed within the first few hundred million years after the Big Bang takes us back in effect to the beginning of time as we are able to perceive it when the first discrete stellar objects appeared out of what has lately come to be known as the cosmic dark age The information that is being gleaned from these dim sources chiefly with the aid of Hubble s namesake the Hubble Space Telescope promises to yield clues to many cosmic puzzles including the nature of the mysterious dark energy that is now believed to pervade all of space      [Astrophysics of the Interstellar Medium](#) Walter J. Maciel,2013-01-11 The space between the stars contains a large diversity of objects in which physical processes occur that are fundamental to the structure and evolution of galaxies This book offers the reader a basic knowledge of these processes and presents simple numeric estimates of the main quantities relevant to the interstellar

medium The main objects that constitute the interstellar space are described but the emphasis of the book lies in the physical processes occurring in these objects which may also occur in other astrophysical environments The book is directed tor graduate as well as advanced undergraduate students of physics and astrophysics *Catalog of the United States Geological Survey Library* U.S. Geological Survey Library,1974 Proceedings and Addresses of the American Philosophical Association American Philosophical Association,1977 List of members in v 1 *List of Books Indexed in Essay and General Literature Index* ,1972 **Author-title Catalogue** Ontario New Universities Library Project,1967 Breakthroughs Claire L.
