## **Students Right To Know:**

**Is Student-Right-to-Know All You Should Know?** Thomas Bailey, Juan Carlos Calcagno, Davis Jenkins, Timothy Leinbach, Gregory Kienzl, 2005 Over the last decade policymakers educators and researchers have increasingly sought to understand community college policies and practices that promote students success This effort has been partly driven by an increased emphasis on outcome accountability but it has also promoted a productive discussion about improving institutional performance The research reported here has two related goals One goal is to work towards strengthening the ability to assess and compare institutional performance We thus have developed a model that can be used to adjust simple graduation rates for institutional characteristics such as student composition college resources size and location all of which might influence those rates Our long term goal is to understand how to improve student outcomes so the paper also uses the model to measure the effect of those institutional characteristics on graduation rates We use data from the Integrated Postsecondary Education Data System IPEDS surveys applying a weighted least squares procedure for grouped data to estimate an institutional completion rates model This analysis confirms several hypotheses about institutional determinants of graduation rates at community colleges Our results indicate a consistent negative relationship between enrollment size and completion Additionally colleges with high shares of minority students part time students and women have lower graduation rates A final significant finding among institutional characteristics is that greater instructional expenditures are related to a greater likelihood of graduation The method developed here can be used to better assess the performance of community colleges Contains 1 figure and 3 tables [The Value of Student Right-to-Know Data in Assessing Community College Performance. CCRC Brief Number 34](#) Thomas Bailey, Peter M. Crosta, Davis Jenkins, 2007 This Brief summarizes a study by the Community College Research Center CCRC that investigated the nature and validity of the SRK rates for community colleges by analyzing data on students attending Florida s 28 community colleges It sought to determine whether the rates provide useful information that can guide educators and policymakers working to improve the performance of community colleges or whether the rates contain biases serious enough to negate their usefulness This Brief also suggests how the process of determining the rates might be improved This brief is based on the CCRC full length paper [What Can Student Right to Know Graduation Rates Tell Us about Community College Performance](#) **Student Athlete**

Reasonable Children Michael S. Pritchard, 1996 The public outcry for a return to moral education in our schools has raised more dust than it has dispelled Building upon his provocative ideas in On Becoming Responsible Michael Pritchard clears the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another's ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education
