Intelligence is arguably one of the most powerful and also problematic tools of the modern state, and one applied not just to foreign policy and security affairs, but also areas as varied as economic strategy and law enforcement. However, the modern world increasingly poses complex challenges to both intelligence and counter-intelligence, ranging from the over-abundance of data to the need to balance the needs of the state and the rights of the individual. Furthermore, not only do modern states outsource a growing share of their intelligence activities to private agencies, but it is also increasingly evident that businesses and non-governmental agencies have their own intelligence assets, even if rarely described or recognized as such.

This course will explore the evolution and dimensions of modern intelligence and counter-intelligence, such that students will develop an informed appreciation of the capabilities and limitations of intelligence and its impact on the modern world.

Intelligence and Government in Britain and the United States Philip H.J. Davies, 2012-04-06 Bringing a dose of reality to the stuff of literary thrillers this masterful study is the first closely detailed comparative analysis of the evolution of the modern British and American intelligence communities *Intelligence and Government in Britain and the United States A Comparative Perspective* is an intensive comparative exploration of the role of organizational and political culture in the development of the intelligence communities of America and her long time ally Each national system is examined as a detailed case study set in a common conceptual and theoretical framework The first volume lays out that framework and examines the U S intelligence community The second volume offers the U K case study as well as overall conclusions Particular attention is paid here to the fundamentally different concepts of what intelligence entails in the United States and United Kingdom as well as to the nations different approaches to managing change and information intensive activities The impact of these differences is demonstrated by examining the evolution of the two intelligence communities from their inceptions prior to World War II through their development during the Cold War and the transformations that have taken place since especially in the wake of the September 2001 terrorist attacks and 2003 invasion of Iraq
