It is becoming ever more important to comprehend today's work and employment issues alongside a knowledge of the dynamics between global financial and product markets, global production chains, national and international employment actors and institutions and the ways in which these relationships play out in different national contexts. This textbook is the first to present a cross section of country studies including all four BRIC countries: Brazil, Russia, India and China, alongside integrative thematic chapters covering all the important topics needed to excel in this field. The textbook also benefits from the editors and contributors' experience as leading scholars in Employment Relations.
