The Quarterly Journal of Public Speaking ,1915 *Teaching and Learning in a Digital World* Michael E. Auer, David Guralnick, Istvan Simonics, 2017-12-26 This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning ICL2017 held in Budapest Hungary on 27 29 September 2017

The authors are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general but especially in engineering education. To face these current real world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this conference has been devoted to new approaches in learning with a focus on collaborative learning. Today, the ICL conferences offer a forum for exchange concerning relevant trends and research results and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context.

Ravindra Goonetilleke, Waldemar Karwowski, 2016-07-26

This book reports on the state of the art in physical ergonomics and is concerned with the design of products, process services and work systems to assure their productive, safe and satisfying use by people. With focus on the human body's responses to physical and physiological work demands, repetitive strain injuries from repetition, vibration, force and posture are the most common types of issues examined along with their design implications. The book explores a wide range of topics in physical ergonomics which includes the consequences of repetitive motion, materials handling, workplace safety and usability in the use of portable devices, design, working postures and the work environment. Mastering physical ergonomics and safety engineering concepts is fundamental to the creation of products and systems that people are able to use as well as the avoidance of stresses and minimization of the risk of accidents. Based on the AHFE 2016 International Conference on Physical Ergonomics Human Factors held on July 27-31, 2016 in Walt Disney World, Florida, USA, the book provides readers with a comprehensive view of the current challenges in Physical Ergonomics which are a critical aspect in the design of any human centered technological system and factors influencing human performance.

Ekawati Marhaenny Dikut, 2021-11-30

Covid 19 has changed our educational landscape. It has created distances yet at the same time it has also created borderless classrooms. Any student can now jump from one classroom to another classroom, not only from their own department but also to faculties and even to universities from all over the world in seconds. An Indonesian student can take courses not only from his/her university but also take courses from Pilipino, Malaysian or U.S.A. University during the course of their studies. This is possible due to the Indonesian's Kampus Merdeka program which has promoted that education is now free to take anyway we like insofar as the requirements of taking the desired class are met. Students want to learn how to become creative and innovative beings. How can the School of Arts and Language Studies such as the English study program can become competitive individuals? This book contains insights and results of research done by students, lecturers, teachers and practitioners who writes on the theme
