

WHAT IS PHILOSOPHY OF LOGIC

Philosophy of logic is the area of philosophy that studies the scope and nature of logic. It investigates the philosophical problems raised by logic, such as the presuppositions often implicitly at work in theories of logic and in their application. It includes the study of the nature of the fundamental concepts used by logic and the relation of logic to other disciplines.

There are 3 types of logics in philosophy :-

- **Formal logic** :- Deals with deductive reasoning and the validity of the inferences produced
- **Informal logic** :- Based on inductive or deductive reasoning
- **Mathematical Logic** :- Combines formal logic and symbolic logic and applies mathematical thinking to them

The Problem of Naturalism Brian Lightbody,2013-05-09 Philosophers often use the term naturalism in order to describe their work It is commonplace to see a metaphysical epistemological and or ethical position self described and described by others as one that is naturalized But what if anything does the term naturalized add or subtract to the position being articulated I demonstrate in *The Problem of Naturalism Analytic and Continental Perspectives* that the term naturalism connotes such a broad meaning that it is difficult to demarcate naturalism from philosophy itself Still many philosophers have tried to provide non trivial and non vacuous definitions of the term My book by and large argues that such attempts are unsuccessful Instead I argue that naturalism is an attitude and neither a methodology nor a substantive position I then articulate the guidelines the naturalist needs to follow as well as the virtues he or she needs to practice in order for the term naturalism to do any meaningful work Much of the book explains and then critiques the various attempts to define naturalism in the Anglo American secondary literature Some of the criticisms I raise seem to emanate from the internal logic of the naturalistic position being expressed However others have emerged from gleaning the work of such Continental thinkers as Nietzsche Husserl Heidegger and Foucault I use these thinkers in order to expose the unjustified implicit and sometimes explicit assumptions that many naturalistic philosophers presume to hold when they attempt to render a clear distinct and robust naturalist position
