Fixico, 2024-09-27 Now in its second edition The American Indian Mind in a Linear World examines the persistence of Native peoples in retaining their own worldviews from the pre Columbian era into the twenty first century The book explores the ways in which Indian people who are close to their cultural traditions think in a circular fashion understand by relying on visual analysis and make decisions from an Indigenous logic Yet Comanches have a different reality from Mohawks Apache ethos is not like that of the Lakotas and Indian men and women see things differently How and why is the Native mind different from the western world Why have white teachers and missionaries tried to change the minds of Native students The Indian perspective is not wrong it is simply different and inclusive another way of looking at the world and universe This edition updates the discussion with a new chapter on contemporary American Indian intellectualism and further analysis of the preservation of Indigenous traditional knowledge Approachable and engaging this volume is a key resource for students and scholars of Native American and Indigenous studies and Indigenous history **Native American Studies** Clara Sue Kidwell, Alan R. **The American Indian Mind in a Linear World** Donald Fixico, 2013-07-04 Currently there are three approaches to studying American Indians from how white Americans approach Indian studies from the dynamics or exchange of Indian white relations and from the Indian point of view Donald Fixico an American Indian has been teaching and writing history for a quarter of a century This book is the direct result of his experience as a scholar who thinks like an Indian in an academic environment created predominantly by non Indian thinkers This book addresses current approaches to studying Native American traditional knowledge and acknowledges an Indian intellectualism that has up until now been ignored in studying Native American history Written primarily from inside the Native world but fully cognizant of the American cultures outside of that world his unique voice speaks to a need for understanding the interior Native world a world in which linear thinking is atypical and circularity is preferable

**The Challenges of Native American Studies** Barbara Saunders, 2004 The essays gathered in this volume celebrate the founding of the American Indian Workshop AIW twenty five years ago as a European forum for Native American studies We present this collection of ongoing debates on the interlaced and interlocking arena of Native American studies and its complicated relation with Native Americans themselves These debates tie in with such questions as Can Native American studies shake off its past and deal with the complexity of political and academic issues in the present Why by whom and for whom is research conducted within this domain and who decides what the next step should be This volume is a modest response to these questions to the validation and substantiation of the cat s cradle of practices of the many disciplines that comprise Native American studies and an attempt to ask the right questions to get past the imperial categories and to thoughtfully mediate and reorientate perspectives

American Indian Studies Dane Anthony Morrison, 1997 This collection of essays brings to college students and the general public a scholarly yet accessible and provocative text in Native American Studies The contributors draw upon their expertise in such diverse disciplines as economics education film studies history linguistics literature museum studies popular culture and religion Each essay highlights a particular aspect of Native American experience from the oppressive indoctrination of boarding schools to the successful strategic planning of Indian casinos to the exciting creativity of Native American literature In addition many of the essays introduce the reader to the disciplines through which we can approach this important and fascinating topic engagingly taking the reader through the process of how historians or economists or literary scholars go about their work

**Going Native** Shari M. Huhndorf, 2015-03-19 Since the 1800 s many European Americans have relied on Native Americans as models for their own national racial and gender identities Displays of this impulse include world s fairs fraternal organizations and films such as *Dances with Wolves* Shari M Huhndorf uses cultural artifacts such as these to examine the phenomenon of going native showing its complex relations to social crises in the broader American society

including those posed by the rise of industrial capitalism the completion of the military conquest of Native America and feminist and civil rights activism Huhndorf looks at several modern cultural manifestations of the desire of European Americans to emulate Native Americans Some are quite pervasive as is clear from the continuing if controversial existence of fraternal organizations for young and old which rely upon Indian costumes and rituals Another fascinating example is the process by which Arctic travelers went Eskimo as Huhndorf describes in her readings of Robert Flaherty s travel narrative *My Eskimo Friends* and his documentary film *Nanook of the North* Huhndorf asserts that European Americans appropriation of Native identities is not a thing of the past and she takes a skeptical look at the tribes beloved of New Age devotees *Going Native* shows how even seemingly harmless images of Native Americans can articulate and reinforce a range of power relations including slavery patriarchy and the continued oppression of Native Americans Huhndorf reconsiders the cultural importance and political implications of the history of the impersonation of Indian identity in light of continuing debates over race gender and colonialism in American culture

**The American Indian Mind in a Linear World** Donald Lee Fixico,2003 Addresses current approaches to studying Native American traditional knowledge and acknowledges an Indian intellectualism that has up until now been ignored in studying Native American history *The Schooling of Native America* Thomas Thompson,1978 This volume consists of essays by Native Americans who are intimately involved in Indian education All of these professionals educators and scholars are deeply committed to the continuity of Native American identity and culture Assembled at the first Native American Teacher Corps Conference in 1973 they shared their varied experiences These essays are the outgrowth of that historic meeting They discuss the problems and challenges in Indian education today from the need for political mobilization to the planning and administration of Indian demonstration schools and programs in Native American studies Their analyses demonstrate deep feeling commitment and a keen understanding of the unique cultural differences between Indians and non Indians
