communication skills business skills using authentic materials and games and activities Both new and experienced teachers should benefit from the activities in the book and the connection to the real world of their learners New to the LSP classroom? A selection of monographs on successful practices Martina Vránová,2023-05-23 As Languages for Specific Purposes have always been defined as student oriented the rationale behind this volume is to use the rather neglected niche of the other necessary agent of language instruction and thus focus on the LSP practitioner This turn towards the instructor has been motivated by the fact that a great number of LSP practitioners enter their jobs without previous expertise They lack LSP education or they may not even have a background in applied linguistics This motivation has proven valid as many of the volume s contributors have faced this particular situation in their professional lives For insights into the LSP field and guidelines on the best practices they must rely on their colleagues who offer to share their experience through workshops conferences or papers which is what this volume provides The primary goal of this volume is to present considerations of what challenges LSP practitioners face and should be prepared for in their jobs and to provide practice tested methodological guidelines on such demanding teaching techniques as blended and flipped learning or tandem learning All papers have been written by LSP practitioners and researchers in higher education Thus this volume provides both guidance and self reflection In other words it is written by experienced LSP practitioners for aspiring LSP practitioners about how they see themselves and what effort they make to meet the challenges of their jobs As proof that LSP practice is a global challenge papers have been collected from many European countries the USA Uruguay Even though most papers are naturally concerned with English being the lingua franca of today the collection also features guidelines for teaching Spanish French and Dutch for specific purposes Moreover the target disciplines these languages are taught for encompass business engineering sociology or medicine thus supporting the assumption of the universal character of problems LSP practitioners deal with **Business English through Coaching and Conversation** David Ostrowski,2020-10-29 Teaching English Online Business English through Coaching and Conversation Full Ebook 195 pages Are you an existing Online English Teacher with a desire to incorporate Business English into your teaching arsenal Or perhaps you re planning to pursue Online Teaching as either a full time profession or side hustle Whichever box you fall into this Ebook could be for you As an experienced Online English Teacher with a background in HR and over 20 years of work experience I largely specialise in Business English teaching via the popular language learning platform Italki in addition to offering private lessons on my website The vast majority of my students are B1 C2 level ADULT PROFESSIONALS based in Russia and across Europe Many work in particular fields such as IT Banking and HR Students such as these may be working for an international company are relocating to an English speaking country or may simply want to focus on their interview technique The issue is however is that much of the Business English material available to teachers has a tendency to focus on overly formal language outdated situations and generalised vocabulary which may not be relevant to individual students Also professionals may be able to

describe the technical intricacies of their job role but struggle when it comes to discussing behaviours 2020 has also seen a change in Business English Boardroom meetings have turned into Zoom calls Job Interviews take place over Skype and the use of informal language on modern communication platforms has become far more prominent This Ebook is split into three simple parts WHY HOW AND WHAT The Why section is aimed at teachers who may have little to no experience in teaching Business English What types of student need to improve their Business English through coaching and conversation For what reasons In what situations do students need to improve their Business English The How section describes useful teaching techniques I have used such as an adapted PPP lesson plan methods of building writing capability a behavioural interview focus and much more Classroom lessons and textbooks for advanced students are not necessarily useful Advanced students want to have a conversation build their confidence and learn new relevant vocabulary Keeping this in mind the What section consists of over 60 behavioural skills based issues based and industry specific conversational lesson plans Each lesson plan contains useful prompts for the teacher relevant phrasal verbs idioms and collocations for the student to use during a lesson in addition to pre work technical prompts for both the student and teacher in the industry specific topics These lesson plans will last you forever You can also find examples of behavioural interview questions which are typically asked in modern times particularly around failure and reflection leadership skills and more instead of the typical What are your strengths and weaknesses questions Overall Business English students need support with confidence This can only be achieved through 1 2 1 coaching and conversation If you are an existing experienced teacher who would simply like to have some useful lesson plans to hand you can purchase the lesson plans only version from this site Happy Teaching

Identity Crisis of Early Career Academics in Applied Linguistics

Mark Feng Teng, 2024-07-12. This book adopts a tripartite framework approach to explore the identity construction of early career researchers in applied linguistics. This tripartite framework of identity in practice, identity in discourse, and identity in activity enables a comprehensive understanding of the complexities involved in the process within the context of China's higher education context. By delving into the complexities of early career teachers' professional development and identity construction in China's evolving higher education landscape, readers gain a deeper understanding of the challenges and opportunities faced by these professionals. This knowledge informs educators and administrators in providing effective support for the professional development of early career teachers, as well as offers insights that may be applicable to teachers and researchers in other contexts. Furthermore, the tripartite framework of teacher identity based on the findings lends support to an expanded notion of professional development that higher education teachers should draw on to empower themselves.
