

# WHAT IS ETHICS?

**Ethics** is based on well-founded standards of what is morally good and bad and morally right and wrong for the society.

**Ethics** establish the rules that individuals need to follow for the survival of the society. Therefore, ethics are subjective and communal.

An **ethical behavior** is an action that is following the rules of what is considered correct in society. On the contrary, a *moral behavior* is driven by the desire to be good.

## **The Ethics:**

*Medicine and the Ethics of Care* Diana Fritz Cates, Paul Lauritzen, 2002-03-01 In these essays a diverse group of ethicists draw insights from both religious and feminist scholarship in order to propose creative new approaches to the ethics of medical care While traditional ethics emphasizes rules justice and fairness the contributors to this volume embrace an ethics of care which regards emotional engagement in the lives of others as basic to discerning what we ought to do on their behalf The essays reflect on the three related themes community narrative and emotion They argue for the need to understand patients and caregivers alike as moral agents who are embedded in multiple communities who seek to attain or promote healing partly through the medium of storytelling and who do so by cultivating good emotional habits A thought provoking contribution to a field that has long been dominated by an ethics of principle *Medicine and the Ethics of Care* will appeal to scholars and students who want to move beyond the constraints of that traditional approach [The Routledge Handbook of the Ethics of Human Enhancement](#) Fabrice Jotterand, Marcello Ienca, 2023-08-01 The Routledge Handbook of the Ethics of Human Enhancement provides readers with a philosophically rich and scientifically grounded analysis of human enhancement and its ethical implications A landmark in the academic literature the volume covers human enhancement in genetic engineering neuroscience synthetic biology regenerative medicine bioengineering and many other fields The Handbook includes a diverse and multifaceted collection of 30 chapters all appearing here in print for the first time that reveal the fundamental ethical challenges related to human enhancement The chapters have been written by internationally recognized leaders in the field and are organized into seven parts Historical Background and Key Concepts Human Enhancement and Human Nature Physical Enhancement Cognitive Enhancement Mood Enhancement and Moral Enhancement Human Enhancement and Medicine Legal Social and Political Implications The depth and topical range of the Handbook makes it an essential resource for upper level undergraduates graduate students and postdoctoral fellows in a broad variety of disciplinary areas Furthermore it is an authoritative reference for basic scientists philosophers engineers physicians lawyers and other professionals who work on the topic of human enhancement [The Ethics](#) Benedict De Spinoza, 2020-03-18 *Ethics Demonstrated in Geometrical Order* Latin *Ethica ordine geometrico demonstrata* usually known as the *Ethics* is a philosophical treatise written by Benedict de Spinoza It was written between 1664 and 1665 and was first published in 1677 The book is perhaps the most ambitious attempt to apply the method of Euclid in philosophy Spinoza puts forward a small number of definitions and axioms from which he attempts to derive hundreds of propositions and corollaries such as When the Mind imagines its own lack of power it is saddened by it A free man thinks of nothing less than of death and The human Mind cannot be absolutely destroyed with the Body but something of it remains which is eternal The first part of *The Ethics* addresses the relationship between God and the universe Tradition held that God exists outside of the universe created it for a reason and could have created a different universe if he so chose Spinoza denies each point

According to Spinoza God is the natural world As with many of Spinoza s claims what this means is a matter of dispute Spinoza claims that the things that make up the universe including human beings are God s modes This means that we and everything else are in some sense dependent upon God The nature of this dependence is disputed Some scholars say that the modes are properties of God in the traditional sense Others say that modes are effects of God Either way the modes are also logically dependent on God s essence in this sense everything that happens follows from the nature of God just like how as Spinoza puts it it follows from the nature of a triangle that its angles are equal to two right angles Since God had to exist with the nature he happens to have nothing that has happened could have been avoided and if a particular fate for a particular mode is fixed by God there is no escaping it or as Spinoza puts it A thing which has been determined by God to produce an effect cannot render itself undetermined God s creation of the universe is not a decision much less one motivated by a purpose The second part of the Ethics focuses on the human mind and body Spinoza attacks several Cartesian positions that the mind and body are distinct substances that can affect one another that we know our minds better than we know our bodies that our senses may be trusted that despite being created by God we can make mistakes namely when we affirm of our own free will an idea that is not clear and distinct
