## **The European City:**

*The European City* D. Burtenshaw, M. Bateman, G. J. Ashworth, 2021-06-29 Originally published in 1991 this book focusses on the philosophies histories and processes which have made the West European city system rich in internal variety yet distinct from that of the rest of western industrialised urban society It synthesizes international experiences in particular aspects of urban policy making with reference to Germany France and Benelux The book covers urban planning in its broadest sense from economic socio spacial recreational housing and transport perspectives [The Political Philosophy of the European City](#) Ferenc Hörcher, 2021-06-03 The Political Philosophy of the European City is a courageous and wide ranging panorama of the political life and thought of the European city Its novel hypothesis is that modern Western political thought since the time of Hobbes and Locke underestimated the political significance and value of the community of urban citizens called civitas united by local customs or even a formal or informal urban constitution at a certain location which had a recognizable countenance with natural and man made architectural marks called urbs Recalling the golden age of the European city in ancient Greece and Rome and offering a detailed description of its turbulent life in the Renaissance Italian city states it makes a case for the city not only as a hotbed of modern democracy but also as a remedy for some of the distortions of political life in the alienated contemporary centralized Weberian bureaucratic state Overcoming the north south divide or the core and periphery partition the book s material is particularly rich in Central European case studies All in all it is an enjoyable read which offers sound arguments to revisit the offer of the small and middle sized European town in search of a more sustainable future for Europe *Multilevel Urban Governance and the 'European City'* Nico Giersig, 2008-09-11 Nico Giersig exemplifies the specificities of Nordic cities within Europe as a whole by means of a systematic comparison of governance arrangements and their dynamics in two Nordic capital regions **The European City** David Burtenshaw, Michael Bateman, Gregory John Ashworth, 1991 Explores the distinction of West European urban experience It also provides an examination of the similarities and differences between urban experiences of West European countries Divided into three sections the first part studies the philosophies histories and procedures that make the West European city system rich in internal variety The second part deals with various aspects of the city s developmental policies and the final section consolidates the previous policies by examining the city plan as a whole [City Limits](#) Glenn Clark, Judith Owens, Greg T. Smith, 2010-02-01 In essays that capture the multiple aspects of urban life contributors examine European cities through the lenses of history literature art architecture and music Covering topics such as governance performance high culture and subculture tourism and journalism this volume provides new and invigorating ways to think about cities both past and present An innovative and interdisciplinary work City Limits crosses conventional critical boundaries to depict a vibrant and moving cityscape of historical urban experience **European Cities** Patrick Le Galès, 2002-08-08 European cities are on the rise and are taking advantage of the opportunities of the European integration

and globalization processes But they also face economic changes social inequalities poverty and a new set of constraints Taking examples through the European Union European Cities explores the impact of the transformation of the nation states on cities and the change of local societies and local governments It argues that new modes of urban governance are emerging and that cities are becoming collective actors within European governance European Cities shows why and how the bulk of European cities still appear to be original forms of compromise aggregation representation of diverse interests and culture Different modes of governance are gradually being structured in most middle size European cities despite processes of social exclusion segregation accompanied by the increased mobility of some citizens Are Europeans going to invent a new form of institutionalized and territorialized capitalism of which medium sized European cities will be one of the pillars and one of the actors Failing that the effects of changing scales could be expressed as profound transformations of the European urban model European Societies Series Series Editor Colin Crouch Very few of the existing sociological texts which compare different European societies on specific topics are accessible to a broad range of scholars and students The European Societies series will help fill this gap in the literature and attempt to answer questions such as Is there really such a thing as a European model of society Do the economic and political integration processes of the European Union also imply convergence in more general aspects of social life like family or religious behaviour What do the societies of Western Europe have in common with those further to the east This series will cover the main social institutions although not every author will cover the full range of European countries As well as surveying existing knowledge in a way that will be useful to students each book will also seek to contribute to our growing knowledge of what remains in many respects a sociologically unknown continent

**Migration and the European City** Christoph Cornelißen, Beat Kümin, Massimo Rospocher, 2022 Migration has always formed an important part of human existence Spatial mobility emerges as a key driver of urban evolution This collection of essays investigates interactions between European cities and migration between c 1400 and the present

**The Globalized City** Frank Moulaert, Arantxa Rodriguez, Erik Swyngedouw, 2003-03-27 This book explores the dynamics that have accompanied the implementation of large scale Urban Development Projects UDPs in nine European cities within the European Union EU It contributes to the analysis of the relationship between urban restructuring and social exclusion integration in the context of the emergence of the European wide new regimes of urban governance These regimes reflect the reawakening of neo liberal policy and the rise of a New Urban Policy favouring private investments and deregulation of property and labour markets The selected UDPs further reflect global pressures and changing systems of local regional and or national regulation and governance These projects while being decidedly local capture global trends and new national and local policies as they are expressed in particular institutional forms and strategic practices The large scale urban interventions were deliberately chosen as reflections of a particular hegemonic and dominant expression of urban policy as pursued during the 1990s The book provides a panoramic view of urban change in some of Europe s greatest

cities The nine case studies include The Europeanization of Brussels The Guggenheim museum in Bilbao the new financial district in Dublin the science university technology complex Adlershof in Berlin the 1998 World Expo in Lisbon Athens s bid to stage the Olympic Games Vienna s Donau City Copenhagen s Oresund project and Naples new business district These case studies testify to the unshakable belief the city elites hold in the healing effects that the production of new urban mega projects and events has on their city s vitality and development potential The book also analyses the down side of this development in terms of social exclusion the formation of new urban elites and the consolidation of less democratic forms of urban governance The principal aim is to show how the production of these new urban spaces is actually also part of the production of a new polity a new economy and new forms of living urban life that are not very promising for a socially harmonious and just future for metropolitan urban Europe

**A Modern History of European Cities** Rosemary Wakeman, 2020-01-23

Rosemary Wakeman s original survey text comprehensively explores modern European urban history from 1815 to the present day It provides a journey to cities and towns across the continent in search of the patterns of development that have shaped the urban landscape as indelibly European The focus is on the built environment the social and cultural transformations that mark the patterns of continuity and change and the transition to modern urban society Including over 60 images that serve to illuminate the analysis the book examines whether there is a European city and if so what are its characteristics Wakeman offers an interdisciplinary approach that incorporates concepts from cultural and postcolonial studies as well as urban geography and provides full coverage of urban society not only in western Europe but also in eastern and southern Europe using various cities and city types to inform the discussion The book provides detailed coverage of the often neglected urbanization post 1945 which allows us to more clearly understand the modernizing arc Europe has followed over the last two centuries
