The Reauthorization of the Export-Import Bank United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs,2009

Export-import Bank United States Government Accountability Office,2017-09-15 Congress established the Export Import Bank of the United States Ex Im to encourage U S exports Congress has directed Ex Im to consider the economic impact of its work and not to fund activities that will adversely affect U S industry In this context GAO reviewed 1 Ex Im s policies and procedures for determining economic impact 2 the extent to which Ex Im appropriately identifies and analyzes projects that could cause adverse economic impact and 3 the extent to which Ex Im s process is transparent To conduct this work GAO reviewed Ex Im s procedures data on projects applicable for the economic impact process and detailed economic impact analyses GAO also interviewed Ex Im and reviewing agency officials and industry representatives Congress requires Ex Im to assess whether a project requesting its financial support will negatively impact U S industry Ex Im uses a screening process to identify projects with the most potential to have an adverse economic impact and then subjects the identified projects to detailed analysis A negative finding could result in a denial of Ex Im support The screens either explicitly required by Ex Im s charter or introduced under the bank s statutory authority include whether 1 the

financed project will increase foreign production 2 there are trade measures against the resulting product 3 the resulting product is undersupplied 4 the requested financing is over 10 million and 5 the financed project will increase foreign production by 1 percent or more of U S production Between fiscal years 2003 and 2005 this screening process identified 20 projects out of 771 applicable that required a detailed economic impact analysis In the detailed analysis Ex Im assesses whether the resulting product would be in surplus on world markets or in competition with U S production Between fiscal years 2003 and 2005 Ex Im approved most projects applicable for economic impact analysis totaling approximately 6.1 billion in approved financing GAO found challenges and areas for improvement in the screening and detailed analysis of projects for economic impact The effectiveness of the 10 million screen introduced under Ex Im s statutory authority is uncertain Ex Im has not determined whether it removes from review those projects that could meet the statutory definition of substantial injury producing 1 percent or more of U S production in an industry For example a 9.9 million financing request that would allow a foreign company to produce an estimated 3.5 percent of U S production was screened out of the analysis GAO also found that Ex Im could improve some methods it uses in its detailed analyses such as how it estimates displaced production In addition GAO found that Ex Im could clarify how it characterizes the effect of its financing on the U S trade balance Finally GAO found that Ex Im could strengthen the internal controls it uses to ensure that the screening process and detailed analysis are conducted consistently and accurately GAO also found limitations in the transparency of Ex Im s economic impact process While Ex Im publicly posts its procedures they contain areas of ambiguity For example the procedures do not define the term oversupply Also Ex Im has not provided all public comments to the board of directors GAO identified two practices referencing in the procedures the list of sectors likely to require extra scrutiny and publicizing final economic impact conclusions that would increase the predictability of the process

Authorization for the Export Import Bank of the United States recently lapsed for the first time in more than 80 years though it may be reestablished at any time We present an economic efficiency analysis of bank s activities in a simple open economy model This analysis brings clarity to the ongoing political debate regarding this institution We discuss key arguments in support of and against the bank s continued activities We highlight the special privileges that the bank offers to a few domestic businesses negatively distorting the private market opportunities in the markets in which these favored businesses operate and widely distributing the economic costs across nonfavored constituencies
