## **Time Lacuna:**

**Time Pioneers** Karl H. Hörning, Anette Gerhard, Matthias Michailow, 2015-10-08 In this book the authors examine the relations between work and time and explore the possibilities of developing new and more flexible working patterns

*Grandparents/Grandchildren* Arthur Kornhaber, Kenneth L. Woodward, 2019-11-20 In this book Kornhaber and Woodward explore the vital connections which link generations to each other and expose a new social contract that destroys the emotional bonds between grandparents and grandchildren This is the first book which reviews in a careful ethnographic manner the relationship of grandchildren to grandparents and the place of love at one end and abandonment at the other by grandparents The authors probe the deep unexplored emotional histories of hundreds of grandparents how they feel about themselves their grandchildren and their loss of function within today's nuclear family With sharp increases in the number of broken families and working mothers grandparents are more vital than ever and also more available than ever This basic research document shows how grandparents recover their natural role as elders of the family and of society The author's basic premise is that to exist is to be connected and that no matter how grandparents act they affect the emotional well being of their grandchildren for better or for worse simply because they exist In an age when mounting economic and social pressures make it increasingly easier to split a family than to sustain one the authors alert us to a forgotten source of family strength the power of grandparents to enrich the lives as a whole The case studies reported in this volume represent a first effort in an area left unexplored by developmental researchers There are lessons here for social scientists but even more for our alienated society Urie Bronfenbrenner Cornell University

**The Chinese Solution** James Sladack, 2012-08-31 Top Secret Mission The President suspends the laws of war Use any means necessary to kill Hitler's greatest commando Otto Skorzeny Skorzeny and a company of Nazi SS soldiers have been transported back in time by Red China tasked with murdering George Washington and assassinating the Founding Fathers Green Beret Colonel Bob Lake two Marine snipers a beautiful intelligence expert a Navy SEAL and an eccentric professor transport to Fort Duquesne and the bloody French Indian War The hunt for the most dangerous Nazi commando in history begins If Skorzeny succeeds the Thirteen Colonies will never unite as a country 20th Century Germany will win WW I and China will emerge as the sole superpower of the 21st Century Lake doggedly pursues the brilliant Colonel Skorzeny and his SS storm troopers through the colonial period and across the American wilderness desperate to save the American Revolution Through it all deadly Indians threaten both the Nazis and the American commandos

*Writing on the Wall* Philip Van Notten, 2005 Although the significance of 9/11 is subject to debate it is symbolic of a general sentiment of discontinuity whereby society is vulnerable to undefined and highly disruptive events Recent catalysts of this sentiment are eye-catching developments such as the SARS Severe Acute Respiratory Syndrome and bird flu outbreaks the Enron and Parmalat scandals political assassinations in Sweden and the Netherlands regime changes in Iraq and Afghanistan and terrorist attacks in Bali Istanbul Madrid and various parts of the

Middle East However recent discontinuities should not be seen as evidence that discontinuities occur more frequently now than they did before Looking back in history we see that disruptive processes are common For example 25 years ago few Europeans would have predicted the upcoming upheavals on their own continent the collapse of communism Berlin as the capital of a reunited Germany the wars in the former Yugoslavia the single European currency and the near doubling of the number of European Union member states Changes elsewhere have been no less discontinuous and unforeseen the fall of the Asian tigers the emergence of the Internet and mobile telecommunication and the presidency of Nelson Mandela Societal discontinuity is a relatively new area of concern in policy development Since the 1970s the consideration of change and discontinuity has gained some ground over predictive forecasting which tended to reason from continuous developments and linear processes Rather than making forecasting the future it has become popular to use scenarios as a manner to consider several possible futures Scenarios are coherent descriptions of alternative hypothetical futures that reflect different perspectives on past present and future developments which can serve as a basis for action Scenario development aims to combine analytical knowledge with creative thinking in an effort to capture a wide range of possible future developments in a limited number of outlooks Scenario development assumes that the future is uncertain and the directions in which current developments might range from the conventional to the revolutionary In theory scenario development is a way to consider future discontinuity However there are indications that the theoretical promise is not reflected in scenario practice Research has shown that scenarios do not consider the idea of discontinuity as a matter of course In our research we found that a scenario study would benefit from efforts to create and foster a culture of curiosity for exploring the future and the possible discontinuities rather than simply commissioning a scenario study to provide insights about the future Only then can one read the writing on the wall of future developments

*Language, Quantum, Music* Maria Luisa Dalla Chiara, Roberto Giuntini, Federico Laudisa, 2013-04-17 A vivid and comprehensive picture of the current state of research in all directions of logic and philosophy of science The book presents a wide combination of papers containing relevant technical results in the foundations of science and papers devoted to conceptual analyses deeply rooted in advanced present day research Audience The volume is attractive both for specialists in foundational questions and scholars interested in general epistemology

**The Calvary Incident** LTC James Sladack, 2016-10-24 Admiral Atkins leads the Athena I project developing the worlds greatest supercomputer Its artificial intelligence discovers how to travel through time Religiously fanatical Admiral Atkins turns rogue He leads six Navy SEALs to ancient Jerusalem to rescue Jesus from the Cross If the SEALs succeed the unintended consequence is an unrecognizable twenty first century with continents covered by thick sheets of ice and missing seven billion people Green Beret Colonel Robert Lake leads a small hunter killer team of special operations troops drawn from all branches of the US military and the British SAS to intercept the SEALs Two civilian experts a brilliant but eccentric professor and a beautiful master linguist complete the team A ruthless CIA zealot sympathetic to the SEALs penetrates the

hunter killer team bent on destroying them from within How will the Green Berets and marines match up against the deadly SEALs How are modern weapons neutralized in close combat by Roman edged weapons Will the temptations of the flesh in ancient Jerusalem corrupt the hot blooded marines What will happen when the SEALs form a relationship with Judas Who could be opposed to saving Jesus Will the hunter killer team turn on Colonel Lake to aid the SEALs in their holy mission Is the past immutable or merely fluid consciousness open to alternate histories A Studied Impression of That Which Is R. Crammond Kennedy,1902 **Straight Lick** J. Ronald Green,2000-09-22 A critical examination of the films of Oscar Micheaux One of the most original and successful filmmakers of all time Oscar Micheaux was born into a rural working class African American family in mid America in 1884 yet he created an impressive legacy in commercial cinema Between 1913 and 1951 he wrote directed and distributed some forty three feature films more than any other black filmmaker in the world a record of production that is likely to stand for a very long time Micheaux s work was founded upon the concern for class mobility or uplift for African Americans Uplift provided the context for Micheaux s extensive commentary on racist cinema such as D W Griffith s 1915 blockbuster The Birth of a Nation which Micheaux answered with his very early films Within Our Gates and Symbol of the Unconquered Uplift explains Micheaux s use of negative images of African Americans as well as his multi pronged campaign against stereotype and caricature in American culture His campaign produced a body of films saturated with a nuanced intertextual signifying boldly and repeatedly treating controversial topics that face white censorship time after time topics ranging from white mob and Klan violence to light skin color fetish to white financing of black cultural productions
