Talbert, 2016-12-16 In an unscientific era when maps were rarities how did ancient Romans envisage their far flung empire This was done by various means for certain including with the aid of an ingenious type of portable sundial that has barely attracted notice As the Romans understood before the first century BCE to track the passage of the sun across the sky hour by hour one needed to know one's latitude and the time of year and that furthermore sundials did not have to be fixed objects These portable instruments crafted in bronze were adjustable for the changes of latitude to be expected on long journeys say for instance from Britain to Spain or from Alexandria to Rome or even on a Mediterranean tour For convenient reference these sundials incorporated lists of twenty to thirty names of cities or regions each with its specific latitude One of the insights of Roman Portable Sundials is that the choice of locations offers unique clues to the mental world map and self identity of individuals able to visualize Rome's vast empire latitudinally The sixteen such sundials known to date share common features but designers also vied to create enhancements Comparison with modern calculations shows that often the latitudes listed are incorrect in which case the sundial may not perform at its best But then the nature of Romans time consciousness or lack of it must be taken into consideration Richard Talbert suspects that owners might prize these sundials not so much for practical use but rather as prestige objects attesting to scientific awareness as well as imperial mastery of time and space In retrospect they may be seen as Roman precursors to comparable Islamic and European instruments from the Middle Ages onwards and even to today's luxury watches which display eye catching proof of their purchasers wealth sophistication and cosmopolitanism Richly enhanced with detailed photographs line drawings maps a gazetteer and a table of latitudes and locations Roman Portable Sundials brings these overlooked gadgets out of the shadows at last to reveal their hitherto untapped layers of meaning [Process Data in Educational and Psychological Measurement, 2nd Edition](#) Hong Jiao, Qiwei He, Bernard Veldkamp, 2021-12-13 Publisher's note In this 2nd edition The following article has been added Jiao H He Q and Veldkamp BP 2021 Editorial Process Data in Educational and Psychological Measurement Front Psychol 12 793399 doi 10 3389 fpsyg 2021 793399 The following article has been added Reis Costa D Bolsinova M Tijnstra J and Andersson B 2021 Improving the Precision of Ability Estimates Using Time On Task Variables Insights From the PISA 2012 Computer Based Assessment of Mathematics Front Psychol 12 579128 doi 10 3389 fpsyg 2021 579128 The following article has been removed
