Telling Tales Over Time Joel Weiss,Robert S. Brown,2013-06-13 How do calendars and clocks influence considerations of school effectiveness From the creation of compulsory education to the future of virtual schooling Weiss and Brown trace two centuries of school practices policies and research linking the concept of time with opportunity to learn School calendars and clocks are shaped by both the physical and social worlds and the clock of schooling is shown to be one of the great clocks of society that helps to frame school effectiveness School time does not operate in a vacuum but within curriculum teaching and learning situations The phrase chrono curriculum was devised by the authors as a metaphor for exploring issues of school effectiveness within the time dimension Using American and Canadian sources stories are created to illustrate four themes about time and school effectiveness The first three stories

utilize access attendance and testing as criteria associated with these eras of schooling How will the story read in the fourth era the digital age which forces us to a reconsideration of time and its influence on education Quoting David Berliner in his Foreword this is an opportune time for these authors to bring us insights into the reasons we in North America created our public school systems and how the chrono curriculum influences those systems The authors presentation of our educational past provides educators a chance to think anew about how we might do schooling in our own times

Essentials of Evaluating Bias in Intelligence Testing Craig L. Frisby, 2025-03-25 Thorough overview of the history viewpoints and research findings of bias in intelligence testing Essentials of Evaluating Bias in Intelligence Testing delivers a comprehensive overview of potential biases that can come to light when making use of IQ tests across demographics detailing where bias can work its way into IQ test selection standardization content administration scoring and interpretation and providing key foundational knowledge on what IQ test bias is versus what it is not as well as the history of bias claims in recent decades Research findings are included throughout the book to provide key context Some of the topics discussed in this book include The Larry P v Wilson Riles trial decision of 1979 which prohibited the use of IQ tests for placing Black students in special education programs and its carryover to today The heritability of IQ scores the nature nurture issue and the role of IQ in the stratification of subpopulation groups in society Implicit assumptions within claims of standardization bias including that all population subgroups must display equal mean scores and that racial ethnic groups are internally homogeneous Essentials of Evaluating Bias in Intelligence Testing is an essential read for educators academics and administrators seeking to understand the full picture on IQ testing and its validity or lack thereof across different demographics

At Our Wits' End Edward Dutton, Michael A. Woodley of Menie, 2018-12-20 We are becoming less intelligent This is the shocking yet fascinating message of At Our Wits End The authors take us on a journey through the growing body of evidence that we are significantly less intelligent now than we were a hundred years ago The research proving this is at once profoundly thought provoking highly controversial and it s currently only read by academics But the authors are passionate that it cannot remain ensconced in the ivory tower any longer With At Our Wits End they present the first ever popular scientific book on this crucially important issue They prove that intelligence which is strongly genetic was increasing up until the breakthrough of the Industrial Revolution because we were subject to the rigors of Darwinian Selection meaning that lots of surviving children was the preserve of the cleverest But since then they show intelligence has gone into rapid decline because large families are increasingly the preserve of the least intelligent The book explores how this change has occurred and crucially what its consequences will be for the future Can we find a way of reversing the decline of our IQ Or will we witness the collapse of civilization and the rise of a new Dark Age
