Studies in Functional Grammar Simon C. Dik, 1980 Content, Expression and Structure Elisabeth

Engberg-Pedersen, 1996 This collection of papers offers an alternative to mainstream functional linguistics on two points Especially in American linguistics function and structure are often viewed almost as polar opposites in addition structure is often understood as being only a matter of linguistic form or expression as opposed to content The book tries to illustrate why function and structure must be understood as mutually dependent in relation to language and why the most interesting aspect of language structure is the way it structures the content side of language In this the book represents a reaffirmation of traditional concerns in structural linguistics especially with respect to the structural integrity of individual languages but with a reversal of traditional priority structure is not autonomous but must be understood on the basis of function Without being hostile to typological and universal generalizations the articles suggest that similarities between languages can only be responsibly discussed on the basis of an understanding that includes a respect for language differences The book contains discussions of a number of different languages including Nahuatl Danish Sign Language French and Tlapanec and focuses on the way meaning is organized in the grammar of Danish A final section sums up theoretical perspectives

Current Research in Functional Grammar, Discourse, and Computational Linguistics, with a Foundation in Systemic Theory, 1993 *Interpersonal Grammar* J. R. Martin, Beatriz Quiroz, Giacomo Figueredo, 2021-06-10 This pioneering volume lays out a set of methodological principles to guide the description of interpersonal grammar in different languages. It compares interpersonal systems and structures across a range of world languages showing how discourse interpersonal relationships between the speakers and the purpose of their communication all play a role in shaping the grammatical structures used in interaction. Following an introduction setting out these principles each chapter focuses on a particular language: Khorchin, Mongolian, Mandarin, Tagalog, Pitjantjatjara, Spanish, Brazilian Portuguese, British Sign Language, and Scottish Gaelic, and explores mood, polarity, tagging, vocation assessment, and comment systems. The book provides a model for functional grammatical description that can be used to inform work on system and structure across languages as a foundation for functional language typology.

Functional Grammar Harry Nathaniel Rivlin, 1930 [Functional Grammar and Verbal Interaction](#) Michael Hannay, Mike Hannay, A. Machtelt Bolkestein, 1998-01-01 Functional Grammar (FG) as set out by Simon Dik is the ambitious combination of a functionalist approach to the study of language with a consistent formalization of the underlying structures which it recognizes as relevant. The present volume represents the attempts made within the FG framework to expand the theory so as to cover a wider empirical domain than is usual for highly formalized linguistic theories, namely that of written and spoken discourse while retaining its methodological precision. The book covers an array of phenomena both from monologue and from dialogue material relating to discourse structure, speaker aims and goals, action theory, the flow of information, illocutionary force, modality, etc. The central question underlying most of the contributions concerns the relation between and the division of labour between the existing grammatical module of FG on the one hand and a discourse or pragmatic module capable of handling such discourse phenomena on the other. What emerges are new proposals for the formal treatment of, for instance, illocutionary force and the informational status of constituents. Many of the data discussed are from real language rather than

being invented and samples from various languages other than English Spanish Polish Latin French are examined and used as illustrations of the theoretical problem to be solved Readership theoretical linguists and discourse and conversation analysts
