

## Stuart Hall

### CULTURAL STUDIES AND ITS THEORETICAL LEGACIES

#### EDITOR'S INTRODUCTION

**T**HIS SHORT EXERCISE in intellectual autobiography by Stuart Hall, arguably the most influential figure in contemporary cultural studies, is **surprisingly downbeat**. That's because it was written at the moment when cultural studies was taking off as an academic discipline in the US, attracting money and **notoriety**, and triggering an extraordinary theoretical "fluency" or textual "ventriloquism" as Hall puts it. This called into question the discipline's seriousness – read its political commitment – and its history. Here Hall reaffirms the first, using the example of AIDS to argue for theory's "deadly seriousness," and recapitulates a personal version of the second.

While recognizing that cultural studies has many histories and legacies (he has particular difficulty with the "Britishness" of "British cultural studies"), Hall insists that, for him at least, the field emerges out of the 1950s disintegration of classical Marxism in its Eurocentrism and its thesis that the economic base has a determining effect on the cultural superstructure. (Hall does not mention the decline of class as an identity-forming category amongst the young in Britain at that time.) Hall acknowledges that cultural studies has been, and must be, formed in interruptions to its trajectories and perceived mission – notably, early on, by feminism and anti-racism. Nevertheless, he argues, what is stable in cultural studies is a Gramscian understanding of "conjunctural knowledge" – knowledge situated in, and applicable to, specific and immediate political or historical circumstances; as well as an awareness that the structure of representations which form culture's alphabet and grammar are instruments of social power, requiring critical and activist examination. It is this kind of examination that is at jeopardy in a professionalised cultural studies, Hall implies.
