The Science of Power Benjamin Kidd, 2015-06-16 Excerpt from *The Science of Power* At some future time the nature of the drama which is at present unfolding itself in history must make a powerful appeal to the human imagination Under our eyes with the confused details of the events of the leading countries of the earth we see the curtain rising upon an entirely new order of the world It is one of the curious features of our day that the nature of the change is as yet scarcely apprehended The shadow of it rests upon all the events of the time The meaning of it encircles the world The instinct of it moves in the minds of distant peoples and of strange races But there is yet scarcely any conception of its nature We are undoubtedly living in the West in the opening stages of a revolution the like of which has never been experienced in history
