The Scientific Case for Creation Bert Thompson, 2000-12-31 This book discusses in a clear yet compelling manner the scientific evidence that supports the biblical account of creation

The Scientific Case Against Scientific Creationism Jon P. Alston, 2003-09 Sociologist Jon P Alston offers a unique and clear analysis of the weaknesses of scientific creationism and intelligent design by identifying what creationists say when they reject evidence for evolution He demonstrates how scientific creationists accept non scientific statements that contradict established scientific knowledge Acceptance of anti evolutionary knowledge also demands acceptance of a literal six day creation and other statements contradicting scientific findings Few persons have read so closely the writings of scientific creationists to illustrate how anti scientific anti evolutionists become when they criticize the fact of evolution Creationists are forced to develop just so stories to defend their literal interpretations of Biblical scripture Alston finds creationists cannot defend their religious beliefs using established scientific methodologies and principles

The Case for a Creator Student Edition Lee Strobel, 2010-12-21 In *The Case for a Creator Student Edition* best selling author and former atheist Lee Strobel and popular writer Jane Vogel take younger readers on a remarkable investigation into the origin of the universe interviewing many of the world's most renowned scientists and following the evidence wherever it leads Their findings presented in the third blockbuster *Case* book student edition offer the most compelling scientific proof ever for intelligent design Perfect for youth groups and young people eager to rebut the Darwinian and naturalistic views taught so commonly in schools

The Case for a Creator Lee Strobel, 2004 My road to atheism was paved by science But ironically so was my later journey to God Lee Strobel During his academic years Lee Strobel became convinced that God was outmoded a belief that colored his ensuing career as an award winning journalist at the Chicago Tribune Science had made the idea of a Creator irrelevant or so Strobel thought But today science is pointing in a different direction In recent years a diverse and impressive body of research has increasingly supported the conclusion that the universe was intelligently designed At the same time Darwinism has faltered in the face of concrete facts and hard reason Has science discovered God At the very least it's giving faith an immense boost as new findings emerge about the incredible complexity of our universe Join Strobel as he reexamines the theories that once led him away from God Through his compelling and highly readable account you'll encounter the mind stretching discoveries from cosmology cellular biology DNA research astronomy physics and human consciousness that present astonishing evidence in *The Case for a Creator* Also available in mass market and audio CD editions
