**The Public** ,1913      **The Accountant** ,1913      *Algol-like Languages* Peter O'Hearn,Robert Tennent,1996-12-01

In recent years there has been a remarkable convergence of interest in programming languages based on ALGOL 60. Researchers interested in the theory of procedural and object oriented languages discovered that ALGOL 60 shows how to add procedures and object classes to simple imperative languages in a general and clean way. And on the other hand researchers interested in purely functional languages discovered that ALGOL 60 shows how to add imperative mechanisms to functional languages in a way that does not compromise their desirable properties. Unfortunately many of the key works in this field have been rather hard to obtain. The primary purpose of this collection is to make the most significant material on ALGOL like languages conveniently available to graduate students and researchers.
