Timely Messages:

My First Church Michael L. Randle, 2022-12-07 Serving the local church as senior pastor is not a small undertaking. Regardless of your education or the years of experience you may have, the job is still tough to manage. The senior pastor of the local church is one person, no matter how large the staff he or she may supervise. Rarely is there a person that can walk into their first-time pastoral experience and hit a home run at first bat. Often the opposite is true. First-time pastors make plenty of their own mistakes. Often they haven't learned how to handle some of the emotional baggage that comes along with their newly assumed pastoral role. Pastor Randle examines his own pastoral experience at his first church to demonstrate how a minister can learn from the principles presented in this book, potentially avoiding the bumps and bruises of ministry. Read this book whether you are serving as a pastor for the first time or not. Your ministry will be blessed. **Stabilization, Safety, and Security of Distributed Systems** Borzoo Bonakdarpour, Franck Petit, 2016-11-01 This book constitutes the refereed proceedings of the 18th International Symposium on Stabilization, Safety, and Security of Distributed Systems (SSS 2016) held in Lyon, France, in November 2016. This year, the Program Committee was organized into three groups reflecting the major trends related to self systems: a Self and Autonomic Computing, b Foundations, and c Networks, Multi-Agent Systems, and Mobility. Self-Stabilizing Systems Shing-Tsaan Huang, Ted Herman, 2007-03-05 The refereed proceedings of the 6th International Symposium on Self-Stabilizing Systems (SSS 2003) held in San Francisco, CA, USA, in June 2003. The 15 revised full papers presented were carefully reviewed and selected from 27 submissions. The papers address self-stabilization issues for various types of systems and software, including communication protocols, sensor networks, biological systems, and directed networks. Several new algorithms are presented. *Fault-Tolerant Parallel and Distributed Systems* Dimitar R. Avresky, David R. Kaeli, 2012-12-06 The most important use of computing in the future will be in the context of the global digital convergence where everything becomes digital and everything is interconnected. The application will be dominated by storage, search, retrieval, analysis, exchange, and updating of information in a wide variety of forms. Heavy demands will be placed on systems by many simultaneous requests. And fundamentally, all this shall be delivered at much higher levels of dependability, integrity, and security. Increasingly large parallel computing systems and networks are providing unique challenges to industry and academia in dependable computing, especially because of the higher failure rates intrinsic to these systems. The challenge in the last part of this decade is to build a system that is both inexpensive and highly available. A machine cluster built of commodity hardware parts with each node running an OS instance and a set of applications extended to be fault-resilient can satisfy the new stringent high-availability requirements. The focus of this book is to present recent techniques and methods for implementing fault-tolerant parallel and distributed computing systems. Section I, Fault-Tolerant Protocols, considers basic techniques for achieving fault tolerance in communication protocols for distributed systems, including synchronous and asynchronous group communication, static total causal ordering protocols, and fail-aware
