## **When Children Die:**

When Children Die Loren Wilkenfeld, 1977      **When Children Die** Institute of Medicine, Board on Health Sciences Policy, Committee on Palliative and End-of-Life Care for Children and Their Families, 2003-10-30 This document is a brief summary of the Institute of Medicine report entitled *When Children Die: Improving Palliative and End of Life Care for Children*. Better care is possible now but current methods of organizing and financing palliative end of life and bereavement care complicate the provision and coordination of services to help children and families and sometimes require families to choose between curative or life prolonging care and palliative services in particular hospice care. Inadequate data and scientific knowledge impede efforts to deliver effective care, educate professionals to provide such care and design supportive public policies. Integrating effective palliative care from the time a child's life threatening medical problem is diagnosed will improve care for children who survive as well as children who die and will help the families of all these children. The report recognizes that while much can be done now to support children and families much more needs to be learned. The analysis and recommendations reflect current knowledge and judgments but new research and insights will undoubtedly suggest modifications and shifts in emphasis in future years.

**When Children Die** Loren Wilkenfeld, 1977      When Children Die Institute of Medicine, Board on Health Sciences Policy, Committee on Palliative and End-of-Life Care for Children and Their Families, 2003-02-09 The death of a child is a special sorrow. No matter the circumstances a child's death is a life altering experience. Except for the child who dies suddenly and without forewarning physicians, nurses and other medical personnel usually play a central role in the lives of children who die and their families. At best these professionals will exemplify medicine with a heart. At worst families' encounters with the health care system will leave them with enduring painful memories, anger and regrets. *When Children Die* examines what we know about the needs of these children and their families, the extent to which such needs are and are not being met and what can be done to provide more competent, compassionate and consistent care. The book offers recommendations for involving child patients in treatment decisions, communicating with parents, strengthening the organization and delivery of services, developing support programs for bereaved families, improving public and private insurance, training health professionals and more. It argues that taking these steps will improve the care of children who survive as well as those who do not and will likewise help all families who suffer with their seriously ill or injured child. Featuring illustrative case histories, the book discusses patterns of childhood death and explores the basic elements of physical, emotional, spiritual and practical care for children and families experiencing a child's life threatening illness or injury.

**When a Child Dies** Richard S Hipps, 2008 *When a Child Dies* gives help and encouragement based on the reality of God's love and covenant with God's children. Written from the heart by parents who know firsthand the pain that follows the loss of a child, these intensely personal stories will help grieving parents deal with life after the child they loved so deeply suffers an untimely death.
