A Constraint Logic Approach to Automated Modal Deduction Richard Brian Scherl,University of Illinois at Urbana-Champaign. Department of Computer Science,1993 The integration of these special purpose reasoners and the general deductive system is accomplished by drawing upon general results in the area of hybrid reasoning It is argued that a number of existing modal deduction methods can be viewed as instances of this general framework The advantages of the general approach are simple proofs of correctness for various instances of the framework applicability to a widevariety of logics and proof methods and ease in incorporating additional features not currently available in automated modal deductive

systems The greater expressivity of logics with these additional features is needed in many A I applications of modal logic such as reasoning about knowledge and action *DETC2005* ,2005 **World Bank Staff Working Paper** ,1981 Genome Research ,2003 Computer Software Structures Integrating AI/KBS Systems in Process Control K.-E.
