Spider Webs:

Spider Webs William Eberhard, 2020-12-01 In this lavishly illustrated first ever book on how spider webs are built function and evolved William Eberhard provides a comprehensive overview of spider functional morphology and behavior related to web building and of the surprising physical agility and mental abilities of orb weavers For instance one spider spins more than three precisely spaced morphologically complex spiral attachments per second for up to fifteen minutes at a time Spiders even adjust the mechanical properties of their famously strong silken lines to different parts of their webs and different environments and make dramatic modifications in orb designs to adapt to available spaces This extensive adaptive flexibility involving decisions influenced by up to sixteen different cues is unexpected in such small supposedly simple animals As Eberhard reveals the extraordinary diversity of webs includes ingenious solutions to gain access to prey in esoteric habitats from blazing hot and shifting sand dunes to capture ants to the surfaces of tropical lakes to capture water striders Some webs are nets that are cast onto prey while others form baskets into which the spider flicks prey Some aerial webs are tramways used by spiders searching for chemical cues from their prey below while others feature landing sites for flying insects and spiders where the spider then stalks its prey In some webs long trip lines are delicately sustained just above the ground by tiny rigid silk poles Stemming from the author's more than five decades observing spider webs this book will be the definitive reference for years to come [Why Do Spiders Make Webs?](#) Debbie Vilardi, 2018-12-15 This book introduces readers to the science behind spider webs Students learn about the uses of spider silk and the different purposes of different kinds of webs Vivid photographs and easy to read text aid comprehension for early readers Features include a table of contents an infographic fun facts Making Connections questions a glossary and an index QR Codes in the book give readers access to book specific resources to further their learning Aligned to Common Core Standards and correlated to state standards Cody Koala is an imprint of Pop a division of ABDO **A Spider's Web** Peter N.
