Research Based Undergraduate Science Teaching Dennis W. Sunal, Cynthia Szymanski Sunal, Emmett L. Wright, Cheryl L. Mason, Dean Zollman, 2014-07-08 RISE Volume 6 examines research theory and practice in teaching undergraduate science. It focuses on developing science literacy and best practices for faculty professional development. The volume includes research on reforming science courses and supporting underrepresented groups in STEM education. [Introduction to Psychometric Theory](#) Tenko Raykov, George A. Marcoulides, 2011-01-07 This new text provides a state of the art introduction to educational and psychological testing and measurement theory that reflects many intellectual developments of the past two decades. The book introduces psychometric theory using a latent variable modeling LVM framework and emphasizes interval estimation throughout so as to better prepare readers for studying more advanced topics later in their careers. Featuring numerous examples it presents an applied approach to conducting testing and measurement in the behavioral social and educational sciences. Readers will find numerous tips on how to use test theory in today's actual testing situations. To reflect the growing use of statistical software in psychometrics the authors introduce the use of Mplus after the first few chapters. IBM SPSS SAS and R are also featured in several chapters. Software codes and associated outputs are reviewed throughout to enhance comprehension. Essentially all of the data used in the book are available on the website. In addition instructors will find helpful PowerPoint lecture slides and questions and problems for each chapter. The authors rely on LVM when discussing fundamental concepts such as exploratory and confirmatory factor analysis, test theory, generalizability theory, reliability and validity, interval estimation, nonlinear factor analysis, generalized linear modeling, and item response theory. The varied applications make this book a valuable tool for those in the behavioral, social, educational, and biomedical disciplines as well as in business, economics, and marketing. A brief introduction to R is also provided. Intended as a text for advanced undergraduate and/or graduate courses in psychometrics, testing and measurement, measurement theory, psychological testing, and/or educational and/or psychological measurement taught in departments of psychology, education, human development, epidemiology, business, and marketing, it will also appeal to researchers in these disciplines. Prerequisites include an introduction to statistics with exposure to regression analysis and ANOVA. Familiarity with SPSS, SAS, STATA, or R is also beneficial. As a whole, the book provides an invaluable introduction to measurement and test theory to those with limited or no familiarity with the mathematical and statistical procedures involved in measurement and testing. **SPSS Base 9.0 User's Guide Package** SPSS, SPSS Inc, 1999 **InfoWorld**, 1992-09-21 InfoWorld is targeted to Senior IT professionals. Key Methods in Geography is an introduction for undergraduates to the principal methodological issues involved in the collection analysis and presentation of geographical information. It provides an accessible primer which will be used by students as a reference throughout their degree on all issues from research design to presentation. A unique feature of the book is that it provides definitions of terms from both human geography and physical geography. Organized into four parts: Getting Started in Geographical Research, Data Collection in Human Geography, Data Collection in Physical Geography, Analyzing and Representing Geographical Data. Each chapter is comprised of a short definition, a summary of the principal arguments, a substantive 5 000 word discussion, the use of real life examples and annotated notes for further reading. The teaching of research methods is integral in all geography courses. *Key Methods in Geography* identifies the key analytical and observational strategies with which all geography undergraduates should be conversant.
