## **Suicide Attack:**

*On Suicide Bombing* Talal Asad, 2007 Drawing on his extensive scholarship in the study of secular and religious traditions as well as his understanding of social political and anthropological theory and research Talal Asad questions Western assumptions regarding death and killing

**Women in Modern Terrorism** Jessica Davis, 2017-01-30 Recent events including the rise of the Islamic State and its overt recruitment of Western women have once again brought the issue of women participating in terrorist organizations to the forefront Yet much remains to be understood about why women join terrorist organizations and why groups choose to incorporate them into their structures and operations *Women in Modern Terrorism* which draws from a unique dataset compiled over a decade tackles these questions and analyzes women's inclusion in terrorist organizations since the beginning of modern terrorism covering both religious and ethno nationalist terrorism and conflict The text opens with a discussion of the definition of terrorism before examining key issues such as how and why women join terrorist groups what women's inclusion in terrorist organizations reveals about the nature and longevity of both the groups and the conflicts the future of women's role in terrorist organizations and attacks particularly given the rise of new terrorist groups in Syria and Iraq and the types of attacks women perpetrate and how they compare across groups By looking at case studies including Hizballah Chechnya the Liberation Tigers of Tamil Eelam Al Qaeda Boko Haram Al Shaabab and more this text shows that women's inclusion in various terrorist organizations is largely a pragmatic choice by the group It also highlights the cross pollination of ideas between differently motivated groups All these issues along with the role of the media and the Internet in radicalization and recruitment processes are explored to provide an exhaustive account of the many roles for women in terrorist groups today

*Terrorists and Suicide Attacks* Audrey Kurth Cronin, 2009-12 Suicide attacks by terrorist organizations have become more prevalent globally and assessing the threat of suicide attacks against the U S and its interests at home and abroad has therefore gained in strategic importance This report focuses on the following questions What are suicide attacks What have been the patterns and motivations for terrorist organizations using suicide attacks in the past What terrorist groups and other organizations are most likely to launch such attacks How great a threat are terrorist suicide attacks to the U S at home and abroad How can the U S counter such a threat The report analyzes the key lessons of the international experience with suicide attacks and examines their relevance to the U S

Systems Sciences and Engineering CISSE 2008 Terrorist Suicide Bombings Mordecai Dzikansky, Gil Kleiman, Robert Slater, 2011-10-10 Urban environments are prime targets for suicide bombings over the next decade While the threat may be ever present measures are available that can empower law enforcement personnel to thwart attacks or at least mitigate the effects by reducing casualties Written by professionals with first hand experience Terrorist Suicide Bombings Attack In

**The Banality of Suicide Terrorism** Nancy Hartevelt Kobrin, 2010 Terrorist organizations have been able to market mass murder under hysteria's banner of alleged martyrdom But when it comes to understanding Islamic suicide terrorism in particular there is much more to it than martyrdom In this groundbreaking book Nancy Kobrin dismantles the psychological dynamics of suicide terrorism to help the reader gain a new perspective on one of the most destructive forces the world has witnessed to date Until now no one has explained why the mother child relationship is central to understanding Islamic suicide terrorism The Banality of Suicide Terrorism exposes the very ordinariness of one of the deepest yet most poorly understood causes of the suicide bomber's motivation a profound terror of abandonment that is rooted in the mother child relationship According to Kobrin this terror is so great in the would be suicide terrorist that he or she must commit suicide and mass murder in the process in order to fend off that terror of dependency and abandonment Suicide terrorists seek a return to the bond with the mother of early childhood known as maternal fusion by means of a death fusion with their enemies who subconsciously represent the loved and hated maternal figure The terrorist's political struggle merely serves as cover for this emotionally terrifying inner turmoil which can lead down the path of ultimate destruction **The Business of Martyrdom** Jeffrey W Lewis, 2012-04-15 The Business of Martyrdom is the only comprehensive history of suicide bombing from its origins in Imperial Russia to the present day It makes use of a framework from the history and philosophy of technology to explain the diffusion and evolution of suicide bombing over the past several decades It is primarily a work of synthesis meant to reach a broad audience and endeavors to integrate as much of the recent scholarly literature as possible including reconciling explanatory mechanisms that seem to be at odds with one another In addition this book is able to draw on very recent changes in suicide bombing in the years 2008 2010 that allow it to have a slightly different perspective than earlier studies For the first time the global number of suicide attacks has declined significantly for three years in a row This book therefore has the advantage of addressing the phenomenon of suicide bombing as a bounded phenomenon with limits to its growth and diffusion To this point the impression that suicide bombers are the smartest bombs yet created has been widespread but confined to the area of metaphor Drawing well established ideas from the history of technology The Business of Martyrdom argues that the metaphor should be taken literally Suicide bombing is a technology that has been invented and re invented at different times in different areas but always for the same purpose resolving a mismatch in military capabilities between antagonists by utilizing the available cultural and human resources Over the past several years analysts have produced a large number of monographs and articles examining suicide bombing The best contributions in this new and

growing literature have shed considerable light on the complexity of suicide bombing in practice particularly regarding the structure of the organizations that deploy suicide bombers and the relationships between these organizations and the recruits whom they utilize in their attacks Nevertheless nagging inconsistencies and questions remain These inconsistencies can be explained by examining suicide bombing as a technological system that integrates human beings cultures and devices and directs them toward specific ends Such an analysis requires that neither the individual bombers nor their sponsoring organizations be the basic unit of discussion Instead the bombers must be understood as components within a much larger system that has been shaped by a host of social cultural and operational constraints throughout its existence Integrating insights from the historical analysis of other technological systems with the recent literature specifically devoted to suicide bombing therefore allows *The Business of Martyrdom* to develop a fuller understanding of suicide bombing as a unified yet diverse phenomenon

***Cutting the Fuse*** Robert A. Pape,James K Feldman,2024-05-31 *Cutting the Fuse* offers a wealth of new knowledge about the origins of suicide terrorism and strategies to stop it Robert A Pape and James K Feldman have examined every suicide terrorist attack worldwide from 1980 to 2009 and the insights they have gleaned from that data fundamentally challenge how we understand the root causes of terrorist campaigns today and reveal why the War on Terror has been ultimately counterproductive Through a close analysis of suicide campaigns by Al Qaeda and other terrorist organizations in Iraq Afghanistan Pakistan Lebanon Israel Chechnya and Sri Lanka the authors provide powerful new evidence that contrary to popular and dangerously mistaken belief only a tiny minority of these attacks are motivated solely by religion Instead the root cause is foreign military occupation which triggers secular and religious people alike to carry out suicide attacks *Cutting the Fuse* calls for new effective solutions that America and its allies can sustain for decades relying less on ground troops in Muslim countries and more on offshore over the horizon military forces along with political and economic strategies that empower local communities to stop terrorists in their midst

*Airpower in Small Wars* James S. Corum,Wray R. Johnson,2003 The use of airpower in wartime calls to mind the massive bombings of World War II but airplanes have long been instrumental in small wars as well Ever since its use by the French to put down rebellious Moroccan tribes in 1913 airpower has been employed to fight in limited but often lengthy small conflicts around the globe This is the first comprehensive history of airpower in small wars conflicts pitting states against non state groups such as insurgents bandits factions and terrorists tracing it from the early years of the twentieth century to the present day It examines dozens of conflicts with strikingly different scenarios the Greek Civil War the Philippine Anti Huk campaign French and British colonial wars the war in South Vietnam before the American escalation counterinsurgency in southern Africa Latin American counterinsurgency operations and counterinsurgency and counterterrorist campaigns in the Middle East over the last four decades For each war the authors describe the strategies

employed on both sides of the conflict the air forces engaged and the specific airpower tactics employed They discuss the ground campaigns and provide the political background necessary to understand the air campaigns and in each case they judge the utility of airpower in its broadest sense In their historic sweep they show how forms of airpower evolved from planes to police helicopters aircraft of the civilian air reserve and today s unmanned aircraft They also disclose how small wars after World War II required new strategies operational solutions and tactics By taking this broad view of small war airpower the authors are able to make assessments about the most effective and least effective means of employing airpower They offer specific conclusions ranging from the importance of comprehensive strategy to the need for the United States and its allies to expand small wars training programs Airpower in Small Wars will be invaluable for educating military professionals and policy makers in the subject as well as for providing a useful framework for developing more effective doctrine for employing airpower in the conflicts we are most likely to see in the twenty first century *Terrorists and Suicide Attacks* Audrey Kurth Cronin, Library of Congress. Congressional Research Service, 2003 **On Alcoholism; the Various Forms of Alcoholic Delirium and Their Treatment. ... Translated by W. S. Greenfield** Jacques Joseph Valentin MAGNAN, 1876 On Alcoholism, the Various Forms of Alcoholic Delirium and Their Treatment V. Magnan, 1876

**The Path to Paradise** Anat Berko, 2007-04-30 Exploring the inner world of suicide bombers has been the focus of Anat Berko s research for years She has worked to understand the thought processes of a people who can choose to place explosives on their bodies and kill themselves taking as many other people with them as they can To learn about the inner world of suicide bombers and their dispatchers Berko entered Israel s most heavily secured prison cells and conducted intensive and extensive interviews with male and female suicide bombers who had failed their missions as well as with their dispatchers including former Hamas spiritual and operative leader Sheikh Ahmed Yassin later assassinated by Israel R sum de l diteur The Enemy of My Enemy George Michael, 2006 In the violent world of radical extremists the enemy of my

enemy is my friend This study reveals how that precept plays out in the unexpected bonding between militant Islam and the extreme right in America and Europe It provides an insightful and sane look at the possibilities for collaboration between these groups *Erased in a Moment* Joe Stork, Kristen Kane, Human Rights Watch (Organization), 2002 Who is a Civilian The Culture of Martyrdom M. A. Khan, 2008 Japan's Imperial Army Edward J. Drea, 2009 The first comprehensive English language history of the Japanese imperial army based largely on Japanese language sources Traces the origins evolution and impact of the army as an engine of Japan s regional and global ambitions and as a catalyst for the militarization of its homeland
