The New Protectionist Wave:

The New Protectionist Wave Enrico Sassoond,2016-07-27 The book reviews protectionist practices in the United States the European Community and Japan It assesses their causes and effects In coverage depth of analysis and vantage point this is a unique study of the new protectionist trends that began in the 1970s and continued into the 1980s Multilateralism in trade relations is now seriously threatened by the deviant behaviour of the industrial nations the would be pillars of the world trading system set up after World War II The new protectionism exerts strong pressures on the weaker components of the trading system the developing nations Born as an intra developed countries affair the new protectionism has in fact shifted its focus on developing countries threatening the newly found outward orientation of many and making more difficult for all to retain the benefits of export trade *Protectionism and World Welfare* Dominick Salvatore,1993-09-23 This volume addresses highly topical issues at a crucial time in international economic relations The world has never been closer to dismantling the liberal multilateral trading system which has been painstakingly established and successfully operated since the Second World War In this volume many of the world s most distinguished economists examine the movement toward protectionism bilateralism and regionalism and its causes effects and possible solutions The contributors are theorists researchers and advisors to governments and international organizations who are at the forefront of trade theory policy and practice and whose analyses have a real impact on international trade By collecting together these analyses in a single volume this book provides a unique survey for students and scholars of economics and all those concerned with trade theory and policy in business and government **The New Protectionism** Tim Lang,Colin Hines,1993 This monograph questions the benefits of free trade arguing that far from promoting prosperity for all those involved free trade only serves a narrow range of interests primarily for the large corporations who conduct it The authors claim that the consequences of present arrangements and those promised under the new GATT agreement will increase the difference between the world s rich and poor and accelerate the destruction of the global environment The authors suggest instead that trading arrangements should emphasize regional self sufficiency and the overall amount of trade should be reduced *Brazil in the Uruguay Round of the GATT* Ricardo Wahrendorff Caldas,2018-12-14 First published in 1998 this volume analyses Brazil s strategy in the Uruguay Round focusing on the issue of services Three different moments were chosen for analysis The first was during discussions before the launch of the Uruguay Round During this period Brazil led the Less Developed Countries LDCs in obstructing the inclusion of services on the agenda The Second was during the launch of the Uruguay Round when Brazil persisted with this policy This second period is referred to as the initial position of Brazil in the Uruguay Round The third was Montreal in 1988 when Brazil supported the principles which guided an agreement on services After this turning point Brazil s position in the Round was increasingly supportive of an agreement not only in services but in all fields **The European Community and the Developing Countries** Enzo R. Grilli,1993 The European

Community has long been the largest trading bloc in the world It is also on the way to becoming the world s largest integrated economic zone Its trade aid and development cooperation policies are therefore of great importance to developing countries At the same time the developing countries have continued to be of interest to the Community both as outlets for its exports and capital investments and as sources of raw materials This 1993 book analyses and evaluates European Community trade aid and industrial policies towards developing countries their origin main features logic evolution and effectiveness in reaching the goals assigned to them The author sums up the state of Europe s development policies by describing them as regional in scope colonial in geographical emphasis discriminatory in their effects and lacking in overall cogency This incisive re evaluation illustrates the different strategies the EC countries might pursue in their relations with the outside world as they progress towards fuller economic integration

Protectionism and International Banking G. Fels,1991-06-18 A collection of papers presented at the International Conference on Protectionism and International Banking held in Frankfurt in October 1987 World bankers trade economists and international trade finance specialists discuss the causes of the resurgence of protectionism

World Agriculture: Towards 2015/2030 Jelle Bruinsma,2017-09-25 This report is FAO s latest assessment of the long term outlook for the world s food supplies nutrition and agriculture It presents the projections and the main messages The projections cover supply and demand for the major agricultural commodities and sectors including fisheries and forestry This analysis forms the basis for a more detailed examination of other factors such as nutrition and undernourishment and the implications for international trade The report also investigates the implications of future supply and demand for the natural resource base and discusses how technology can contribute to more sustainable development One of the report s main findings is that if no corrective action is taken the target set by the World Food Summit in 1996 that of halving the number of undernourished people by 2015 is not going to be met Nothing short of a massive effort at improving the overall development performance will free the developing world of its most pressing food insecurity problems The progress made towards this target depends on many factors not least of which are political will and the mobilization of additional resources Past experience underlines the crucial role of agriculture in the development process particularly where the majority of the population still depends on this sector for employment and income

Grilli,1997-07-13 The book deals with both the short and the long run effects of the Uruguay Round the reduction in the obstacles to trade the enlargement of the multilateral system the new institutional framework and the balance between regionalism and multilateralism in world trade relations Its conclusions are based on theory political economy and empirical analysis
