**The Chimps of Mt. Asserik** Stella Margaret Brewer,1978      **The Chimpanzees of Rubondo Island** Josephine Nadezda Msindai,Volker Sommer,2022-10-05 How did a random batch of chimpanzees come to populate a small island in Tanzania where apes had never lived before Combining information gathered from fieldwork laboratory and archival research this book tells the unique story of chimpanzee babies taken from their forest homes in West Central Africa and sold to European zoos and circuses to then be shipped to Lake Victoria and set free on Rubondo Island These founder animals learnt what to eat how to build nests to breed and raise young ultimately forming a chimpanzee typical fission fusion society that today is thriving The authors compare the ecology behaviour and genetics of the Rubondo population with communities of wild chimpanzees providing exciting insights into how our closest relatives adjust to changing environments At the same time a reconstruction of the historical context of the Rubondo experiment reflects on its chequered colonial heritage and the introduction is viewed against current threats to the survival of apes in their natural habitats The book will be of interest to scholars and professionals working in primatology animal behaviour conservation biology and postcolonial studies

**Chimpanzees, War, and History** R. Brian Ferguson,2023 The question of whether men are predisposed to war runs hot in contemporary scholarship and online discussion Within this debate chimpanzee behavior is often cited to explain humans propensity for violence the claim is that male chimpanzees kill outsiders because they are evolutionarily inclined suggesting to some that people are too The longstanding critique that killing is instead due to human disturbance has been pronounced dead and buried In *Chimpanzees War and History* R Brian Ferguson challenges this consensus Bringing readers on a journey through theoretical struggle and clashing ideas about chimpanzees bonobos and evolution Ferguson opens new ground on the age old question are men born to kill      **The Cultured Chimpanzee** W. *Best Practice Guidelines for the Re-Introduction of Great Apes* Benjamin Beck,2007 From the website Although the IUCN has previously established working protocols for plant and animal re introduction the great apes present unique challenges and concerns owing to their singular cognitive development This prompted the Primate Specialist Group to reconsider the existing guidelines in terms of the specific needs of great apes The resulting synthesis representing the expert opinion of primatologists and re introduction practitioners is presented here as part of the series of best practices documents Specifically designed for rehabilitators and specialists in re introduction these guidelines start from the fundamental assumption that re introductions should not endanger wild populations of great apes or the ecosystems they inhabit Equally important is the health and welfare of the individual great apes being re introduced as well as the caretaker staff and the residents of the surrounding areas The re introduction guidelines also require that the factors which first threatened great apes in the proposed site of release have been addressed and resolved      [The Extinction of Sivapithecus](#) Sherry Nelson,2021-11-15 Sherry V Nelson examines the adaptations and extinction of Sivapithecus a Miocene hominoid in the

Ross, Tetsuro Matsuzawa, 2010-08-15 Understanding the chimpanzee mind is akin to opening a window onto human consciousness Many of our complex cognitive processes have origins that can be seen in the way that chimpanzees think learn and behave The Mind of the Chimpanzee brings together scores of prominent scientists from around the world to share the most recent research into what goes on inside the mind of our closest living relative Intertwining a range of topics including imitation tool use face recognition culture cooperation and reconciliation with critical commentaries on conservation and welfare the collection aims to understand how chimpanzees learn think and feel so that researchers can not only gain insight into the origins of human cognition but also crystallize collective efforts to protect wild chimpanzee populations and ensure appropriate care in captive settings With a breadth of material on cognition and culture from the lab and the field The Mind of the Chimpanzee is a first rate synthesis of contemporary studies of these fascinating mammals that will appeal to all those interested in animal minds and what we can learn from them **Eating Apes** Dale Peterson, 2003-05-01 Eating Apes is an eloquent book about a disturbing secret the looming extinction of humanity's closest relatives the African great apes chimpanzees bonobos and gorillas Dale Peterson's impassioned expos details how with the unprecedented opening of African forests by European and Asian logging companies the traditional consumption of wild animal meat in Central Africa has suddenly exploded in scope and impact moving from what was recently a subsistence activity to an enormous and completely unsustainable commercial enterprise Although the three African great apes account for only about one percent of the commercial bush meat trade today's rate of slaughter could bring about their extinction in the next few decades Supported by compelling color photographs by award winning photographer Karl Ammann Eating Apes documents the when where how and why of this rapidly accelerating disaster Eating Apes persuasively argues that the American conservation media have failed to report the ongoing collapse of the ape population In bringing the facts of this crisis and these impending extinctions into a single accessible book Peterson takes us one step closer to averting one of the most disturbing threats to our closest relatives *The New Yorker* Harold Wallace Ross, Katharine Sergeant Angell White, 1978-10 **Understanding Chimpanzees** Paul G.
