*The Gifted-case Studies* Barbara B. Hauck, Maurice F. Freehill, 1972      Exploring Critical Issues in Gifted Education Christine L. Weber, Cecelia Boswell, Wendy A. Behrens, 2021-09-03 Although the best way to provide professional development for educators is through field experiences and hands on practice it is not always easy or even possible to organize such encounters especially in the field of gifted education In order to better prepare educators to work with gifted and talented students Exploring Critical Issues in Gifted Education A Case Studies Approach presents problem based learning scenarios that explore authentic situations found in K 12 classrooms The scenarios can be read and discussed in a short amount of time allow the reader to gain greater understanding through empathy require an analysis of multiple perspectives and support the standards of excellence set forth in the 2010 NAGC Pre K Grade 12 Gifted Education Programming Standards Using the cases in the book educators will gain the insight needed to improve the identification of and services for gifted and talented students in light of these standards      *The Gifted-- Case Studies* B. B. Hauck, M. F. Freehill, 1975      Differentiating Instruction for Gifted Learners Christine L. Weber, Wendy A. Behrens, Cecelia Boswell, 2021-09-03 Differentiating Instruction for Gifted Learners allows educators and stakeholders to examine issues related to differentiating curriculum and instruction in a variety of contexts The case studies in this rich resource analyze various differentiation strategies and their benefits to promote classrooms where every student belongs every student is valued and every student is nurtured The cases facilitate conversations about children and their unique needs by situating learning in authentic and meaningful contexts with the goal of helping educators improve services and programs for gifted and talented students Things to Consider guide the reader s thinking without imparting an explicit action recommendation or solution Discussion questions activities extensions and suggestions for additional readings support the standards of excellence set forth in the revised NAGC CEC Teacher Preparation Standards in Gifted and Talented Education and the NAGC CEC Advanced Standards in Gifted Education Teacher Preparation      **The Gifted-case Studies** Barbara B. Hauck, 1972      **Families, Education and Giftedness** Jim Campbell, Laura Mazzoli Smith, 2013-02-12 What is it like to be YOUNG GIFTED AND WORKING CLASS in contemporary England How do working class family values support high educational achievement What do researchers and policy makers have to learn about giftedness from working class families These provocative questions are explored in this ground breaking book Most studies of giftedness focus on the characteristics of individuals and draw upon psychological frameworks to understand them Participants in most gifted education programmes are recruited disproportionately from the higher social classes Sceptical of the concept of giftedness Mazzoli Smith and Campbell question conventional methodologies using a narrative approach to understand how four families of working class origins each with a gifted child construct their values in relation to education and social class They explore the influence of their family histories cultural values and life styles upon educational engagement and achievement

The authors show that gifted education policies are poorly matched to the values of these families and argue that much research into giftedness has been flawed by social and cultural discrimination. They propose an agenda for change in research paradigms in the giftedness field which should be characterized by interdisciplinarity and more culturally relative conceptions of giftedness.
