**Supreme Court of the State of New York, Appellate Division- First Department** , *Pandora's Picnic Basket : The Potential and Hazards of Genetically Modified Foods* Alan McHughen,2000-06-22 The first book to look at all the issues involved in GM genetically modified food technology in a clear and dispassionate way Alan McHughen surveys the technology that makes GM food possible assesses the risk of health and environmental dangers and the regulatory and labelling processes in force to protect the consumer Question and answer boxes and case histories and the author s easy writing style make this an essential purchase for all those interested in the debate Are you concerned about fish genes in tomatoes Worried that brazil nut genes in soybeans can result in potentially lethal allergic reactions That rapeseed plants bred to be resistant to herbicides could become uncontrollable superweeds You are not alone The issue of genetically modified foods has fast become one of the most debated of recent years with scientists and companies seeking to develop the technology on one side and consumer groups and environmentalists on the other However in spite of the great heat generated by the debate there is very little real information on the subject either about the technologies in use or about the regulatory processes established to approve the processes and the products This book sets out to explain in clear and direct language the technologies underlying so called genetically modified food and compares them with other natural methods of plant breeding and production The author then looks at the safeguards in place from regulators around the world and asks whether these are sufficient The question of labelling held by some to be an obvious way out for concerned consumers is examined and the honesty and usefulness of some of these labels addressed The book then looks at issues of real concern particularly environmental issues and ways in which a consumer can seek to avoid GMOs if they so choose In each chapter key topics are addressed through question and answer boxes Real case histories illustrate the development and regulation of GMOs and by the end of the book the reader will be able to make an informed choice about whether to support or challenge this technology the products of which are increasingly pervasive

*Cornea and Refractive Surgery* New Orleans Academy of Ophthalmology. Session,1998 Preface From Friday morning February 21 1997 through Sunday February 23 at noon members and guests of the New Orleans Academy of

Ophthalmology heard presentations and discussions of the latest techniques and trends in the study of corneal diseases and surgery including refractive surgery This was the subject of the Forty Sixth Annual Symposium of the Academy The speakers comprised a group of eight clinician surgeons with a wealth of experience and a well respected talent for innovation in their areas of expertise From trends in bacterial keratitis to ocular surface disease and healing to the latest opinions on anterior segment reconstruction and refractive surgery the topics covered were diverse and timely Especially interesting were the discussions generated by the panelists presentations and by the question and answer sessions The demands placed on the speakers at the Annual Meeting of the New Orleans Academy of Ophthalmology are large and multiple and probably greater than for most other educational conferences Each speaker commits to preparing several lectures and usually a panel discussion for presentation and all speakers are asked to participate in the panel discussions and question and answer periods The topics are chosen by the program committee and we sometimes ask speakers to present a subject that is not in their area of research or primary interest This usually means researching and preparing a completely new lecture And last but not least all speakers commit to preparing chapters and completing panel discussions for this book And these duties are added to already busy practice and speaking schedules in fact the speakers are selected because they have new ideas and useful things to say that everyone wishes to hear Not all invited speakers are up to the task but this year we were fortunate that all of our first choices accepted the challenge Because of the rapidity of change in both refractive surgery and anterior segment treatment we have attempted to provide the transactions as rapidly as possible This urgency has again added more demands on the time and energy of the speakers And this group of authors has responded admirably to our requests Because of their efforts the reader can use this publication as an update and as a gauge to his her present practice guidelines I wish to thank all eight speaker authors for their efforts on behalf of the New Orleans Academy of Ophthalmology and the readers of this publication The information presented here was put on paper by the authors but we readers are the ones who benefit In addition they have added to a forty year tradition of publications by the New Orleans Academy of Ophthalmology I hope that readers consider this book as timely and as useful as previous issues of the Transactions I also wish to thank Monica L. Monica MD President of the NOAO and the Executive Committee for supporting the program and this publication As always a considerable amount of time and effort came from Emily Busby executive secretary of the NOAO and my thanks go to her as well Lastly Marguerite McDonald MD deserves much credit in the organization of the meeting and the program Her knowledge and experience were truly indispensable Daniel A Long MD
